

NAGABHAIRU VINOD KUMAR | Business Analyst

Location: MA, USA | Phone: +1 (774) 777-8264 | Email: vinodkumarnagabhairu@gmail.com | LinkedIn

SUMMARY

Results-driven **Business Analyst** with **3+ years of experience** in driving data-driven decision-making, optimizing revenue cycle workflows, and leading cross-functional teams to enhance business operations. Adept at **gathering and analyzing requirements**, streamlining workflows, and implementing **automation solutions** to improve efficiency and reduce costs. Experienced in leveraging **predictive analytics (Python, TensorFlow)**, **data visualization (Power BI, Tableau)**, and **ETL workflows** to optimize processes and enhance system integration. Strong background in **API development**, **compliance (HIPAA, CMS)**, and **stakeholder collaboration**, ensuring seamless business and technology alignment. Proven track record in **UAT execution**, **dashboard redesign**, **KPI monitoring**, and **regulatory risk analysis**, delivering actionable insights that drive operational excellence. Passionate about **solving complex business challenges** through data-driven solutions, process automation, and strategic decision-making.

TECHNICAL SKILLS

Business Analysis: BRD, FRD, User Stories, Workflow Design, Stakeholder Engagement, Gap Analysis, SWOT Analysis, ROI

Project Management: Agile & Scrum Methodologies, UAT Planning & Execution, Progress Reporting, Risk Analysis

Data Analysis: Tableau, Power BI, KPI Monitoring, Predictive Analytics (Python, TensorFlow), Dashboard Creation

Systems & Integration: API Design & Implementation, ETL Workflows, Real-Time System Integration (EHR, RCM tools)

Compliance: HIPAA, CMS Compliance, Automated Risk Monitoring, Regulatory Check Implementation

UI/UX Collaboration: Dashboard Redesign, User Experience Optimization, Patient-Facing Portal Design

Programming: Python, SQL

Technologies: TensorFlow, APIs, ETL Pipelines

Tools: JIRA, Confluence, Microsoft Office Suite, Advanced Excel, Tableau, Power BI

PROFESSIONAL EXPERIENCE

Change Healthcare, TX

Jan 2024 – Current

Business Analyst

- Streamlined **RCM workflows** by gathering requirements from **15+ stakeholders** and implementing **automation**, reducing **claim denial rates** by 30% and improving operational efficiency.
- Developed **predictive analytics models** in collaboration with data scientists, leveraging **Python** and **TensorFlow** to identify **high-risk claims** and cut processing delays by 25%.
- Led **UAT** for **15 pilot providers**, creating **test scenarios** and incorporating feedback to enhance **system reliability** and **usability**.
- Designed and implemented **APIs** for seamless integration of **RCM tools** with **EHR systems**, ensuring **real-time data synchronization** and improving **cross-platform compatibility**.
- Created comprehensive **BRDs** and **30+ user stories** to guide **agile sprint planning** and deliverables, ensuring alignment between **technical teams** and **business goals**.
- Designed **patient-facing billing portals**, enhancing **transparency**, enabling **flexible payment options**, and increasing **patient satisfaction scores** by 15%.
- Migrated and standardized **historical claims data** using **ETL workflows**, addressing **data inconsistencies**, and achieving **100% data integrity** during deployment.
- Collaborated with **cross-functional teams**, ensuring **HIPAA** and **CMS compliance** while delivering **real-time dashboards** for actionable insights into **claims and operational KPIs**.

Hexaware Technologies, India

Jun 2021 – Jun 2022

Business Analyst

- Led **end-to-end digital transformation** for a leading **healthcare provider**, optimizing **patient engagement** through a centralized platform, **reducing no-show rates by 40%** and enhancing telehealth adoption.
- Gathered and documented business requirements (BRD, FRD, user stories)** by conducting **stakeholder interviews** with hospital administrators, doctors, and IT teams, ensuring alignment with business goals and **HIPAA compliance**.
- Designed and optimized workflow automation** for appointment scheduling, insurance verification, and billing, resulting in a **30% reduction in administrative processing time**.
- Collaborated with cross-functional teams (developers, UX designers, data analysts)** to implement a **scalable patient portal**, integrating **telehealth services** and **AI-powered chatbots**, improving patient accessibility and response rates.
- Developed real-time analytics dashboards** using **Power BI and Tableau**, providing insights on patient engagement, operational efficiency, and financial performance, enabling **data-driven decision-making** for stakeholders.
- Facilitated UAT testing and system validation**, leading end-user training for healthcare providers and administrative teams, ensuring a **95% adoption rate** post-implementation.
- Partnered with IT teams to integrate patient engagement solutions** with **Electronic Health Records (EHR) systems**, improving data interoperability and accessibility across multiple locations.
- Managed Agile project delivery**, collaborating with product owners, developers, and quality assurance teams in **Scrum ceremonies (daily stand-ups, sprint planning, retrospectives)** to ensure timely delivery of features.
- Ensured regulatory compliance (HIPAA, GDPR)** by conducting **risk assessments**, **security audits**, and **policy alignment**, mitigating potential data privacy concerns and enhancing **healthcare data governance**.

- **Conducted competitive analysis and market research** to benchmark digital healthcare trends, enabling strategic enhancements that improved **telehealth adoption and patient satisfaction scores**.

Cybage Software, India
Business Analyst

Sep 2020 – May 2021

- **Led end-to-end business analysis** for the **Shotzr Digital Transformation Project**, gathering requirements, defining KPIs (CTR, CPC, ROI), and optimizing AI-driven **image personalization and ad targeting strategies**.
- **Developed and maintained Business Requirement Documents (BRD) and Functional Specification Documents (FSD)** to align project objectives with business goals, ensuring seamless integration of AI-powered **recommendation engines**.
- **Collaborated with data engineers and product teams** to design and implement **ETL pipelines**, integrating **machine learning models** into Shotzr’s platform, enhancing image searchability and ad placement.
- **Designed interactive Tableau and Power BI dashboards** to track **real-time ad performance metrics**, enabling stakeholders to monitor and optimize ad campaigns based on data-driven insights.
- **Facilitated Agile ceremonies**, including **daily stand-ups, sprint planning, and UAT sessions**, ensuring smooth execution of AI-powered workflow enhancements and a 62% increase in CTR.
- **Conducted stakeholder interviews and competitive analysis** to identify industry trends, user engagement gaps, and areas for ad performance improvements, leading to a **3x increase in Shotzr’s ROI**.
- **Defined and implemented A/B testing strategies**, refining AI-based recommendation models that improved user engagement and reduced **cost per click (CPC) by 30%**.
- **Worked with cross-functional teams (product managers, data scientists, and UI/UX designers)** to improve **ad recommendation logic**, driving higher engagement and ensuring seamless user experience.
- **Led UAT sessions and documented over 50+ test cases**, identifying workflow inefficiencies and enhancing AI-driven personalization accuracy.
- **Provided training and user adoption support** for Shotzr’s **marketing and analytics teams**, ensuring successful onboarding to newly developed tools and dashboards.

EDUCATION

Master of Science in Data Analytics (STEM) Clark University; Worcester, MA	May 2024
Masters of Technology - Software Engineering Vellore Institute of Technology; Amaravathi, India	May 2022
