

Professional Summary:

Results-driven .NET Full Stack Developer with 5 years of experience in designing, developing and deploying scalable enterprise applications using .NET 6/7/8/9, ASP.NET Core, C#, Angular 15–17+, and Azure Cloud Services. Expertise in building cloud-native, microservices-based architectures with strong emphasis on performance optimization, API integration, and security compliance (HIPAA, GDPR). Proficient in developing responsive front-end interfaces using Angular, TypeScript, HTML5, CSS3, and Bootstrap, integrated with robust back-end RESTful APIs and SQL/NoSQL databases. Skilled in CI/CD automation, containerization (Docker, Kubernetes) and infrastructure as code (Terraform) to streamline deployment pipelines via Azure DevOps. Adept at implementing event-driven architectures using Azure Event Hub and IoT Hub and delivering data-driven insights through telemetry and monitoring tools.

Technical Skills:

Languages & Frameworks: .NET 6/7/8/9, .NET Core, .NET Framework, C#, ASP.NET Core, Blazor, TypeScript, JavaScript (ES6+), Python, SQL, PL/SQL, HTML5, CSS3, Angular 15–17+, React, Node.js, Bootstrap, Vue.js, Material UI, Tailwind CSS.

Databases: SQL Server, Azure SQL Database, T-SQL, MySQL, PostgreSQL, Oracle, MongoDB, Cassandra, Redis, Cosmos DB, Firebase, Elasticsearch.

Cloud & DevOps Tools: Microsoft Azure (App Service, Azure Functions, Azure DevOps, AKS, API Management, Storage, Key Vault, Event Hub, IoT Hub, Logic Apps, Application Insights), AWS, Docker, Kubernetes, Terraform, Git/GitHub, GitLab, Visual Studio, VS Code, Swagger, Postman, Jenkins, CI/CD, SonarQube, Helm, ArgoCD.

Web & API Technologies: RESTful APIs, Web APIs, GraphQL, gRPC, WebSockets, JSON, XML, SignalR, OData, OAuth2, OpenID Connect, JWT Authentication.

Testing & Automation: JUnit, Mockito, Jest, Selenium, xUnit, NUnit, Playwright, Cypress, Postman (API Testing).

Architecture & Design: Microservices, Serverless Architecture, Distributed Systems, System Design, Software Architecture, Design Patterns, SOLID Principles, Clean Architecture, Domain-Driven Design (DDD).

Monitoring & Analytics: Azure Application Insights, ELK Stack, Prometheus, Grafana, Splunk.

Methodologies & Practices: Agile/Scrum, Test-Driven Development (TDD), Behavior-Driven Development (BDD), DevOps, CI/CD, Secure SDLC, GitOps.

Other Skills: Data Structures & Algorithms, Multi-Threading, Problem Solving, Communication, Leadership, AI/ML Integration with .NET (ML.NET, Azure Cognitive Services).

Education & Certifications:

- Master of Science in Information Systems from Central Michigan University, USA – 2023.
- Bachelors in Computer Science and Engineering from KL University, India – 2021.
- **Microsoft Azure Fundamentals (AZ-900)** – Microsoft Certified.
- **Foundational C#** - Microsoft Certified.

Professional Experience:

Software Developer/Full Stack .Net Developer | CareHealth – Remote, USA | April 2025 – Present

- Designed and developed a **HIPAA-compliant oncology management platform** using .NET 8/9, ASP.NET Core Web APIs, and Angular 17+, improving clinical workflows for patient treatment and care coordination.
- Architected **microservices-based APIs** integrated with **Athena Health** and **FDB** services for real-time patient data synchronization and drug interaction validation, enhancing medication safety by **25%**.
- Implemented **secure authentication and authorization** using **OAuth2 and JWT**, ensuring compliance with healthcare data protection standards.
- Optimized **SQL Server** and **Azure SQL Database** performance through indexing, partitioning, and stored procedure tuning, reducing query latency by **30%**.
- Deployed and managed applications using **Azure App Service** and **Azure Functions**, leveraging **Application Insights** and **Azure Monitor** for performance and telemetry tracking.
- Integrated **Azure DevOps CI/CD pipelines** for automated build, testing, and deployment processes, improving release speed and consistency.
- Collaborated in **Agile/Scrum** teams for sprint planning, code reviews, and daily stand-ups to deliver scalable, maintainable full-stack solutions.

- Enhanced UI responsiveness and accessibility using **Blazor components**, **Bootstrap**, and **Tailwind CSS** for a seamless user experience.

Tech Stack: .NET 8/9, ASP.NET Core, C#, Angular 17+, Blazor, Azure App Service, Azure Functions, SQL Server, Azure SQL Database, FDB APIs, Athena APIs, Azure Application Insights, Azure DevOps, OAuth2, JWT, Docker, Microservices Architecture.

Full Stack Developer/Engineer | Garranto – Remote, USA/India | Jan 2022 – Dec 2024

- Led the modernization of **legacy enterprise applications** by re-engineering them into **microservices-based architectures** using **.NET Core** and **ASP.NET Core Web APIs**, improving scalability and fault tolerance.
- Built responsive, modular front-end interfaces with **Angular 15+**, **TypeScript**, **RxJS**, and **NgRx**, improving load times by **25%** and standardizing UI/UX across client applications.
- Developed **secure RESTful APIs** integrated with **OAuth2** and **JWT authentication**, ensuring data security and compliance across distributed systems.
- Created **shared Angular libraries** and UI components for authentication, dashboards, and forms, accelerating new project onboarding and reducing duplicate code by **40%**.
- Engineered and optimized **Azure SQL Databases** with indexing, partitioning, and stored procedure optimization, resulting in a **35% boost in query efficiency** and improved compliance readiness.
- Orchestrated migration from on-premise to **Azure Cloud** Leveraging **App Service**, **Azure Functions**, and **Azure Kubernetes Service (AKS)** for improved scalability, uptime, and cost efficiency.
- Implemented **containerized CI/CD pipelines** using **Azure DevOps**, **Docker**, and **Terraform**, automating build, test, and deployment workflows for faster, more reliable releases.
- Integrated **real-time analytics and telemetry** via **Azure Event Hub** and **IoT Hub**, enabling live monitoring and predictive insights for enterprise clients.
- Followed **Clean Architecture and Domain-Driven Design (DDD)** principles to deliver maintainable, testable, and scalable applications.
- Collaborated with cross-functional teams in **Agile/Scrum** environment to ensure timely delivery, sprint planning, and continuous integration improvements.

Tech Stack: .NET Core, ASP.NET Core, C#, Angular 15+, TypeScript, RxJS, NgRx, HTML5, CSS3, Azure App Service, Azure Functions, AKS, Azure SQL Database, Event Hub, IoT Hub, Docker, Terraform, Azure DevOps, Git, OAuth2, JWT, Microservices Architecture, Clean Architecture.

.NET Developer | HSBC, India | Jan 2021 – Dec 2021

- Designed and developed enterprise web applications following **SDLC and Agile** methodologies, contributing to scalable and maintainable system architecture for banking operations.
- Built and enhanced **customer-facing modules** using **ASP.NET MVC 5**, **C#**, **Entity Framework**, and **SQL Server**, improving transaction efficiency and overall user experience.
- Developed **RESTful Web APIs** using **ASP.NET Core** and migrated selected **WCF services** to modern REST endpoints, aligning with HSBC's API modernization strategy.
- Implemented **front-end components** using **Angular 4**, **HTML5**, **Bootstrap**, and **AJAX**, ensuring responsive and interactive user interfaces across browsers.
- Utilized **Azure SQL Database**, **Blob Storage**, and **Azure Storage Queues** for cloud data management and inter-service communication, improving data accessibility and process automation.
- Optimized database operations by developing stored procedures, triggers, and indexes in **SQL Server 2016**, reducing query execution time by **20%**.
- Worked on **data binding and business logic integration** through WPF class libraries and implemented service-level data validation and transformation using **LINQ** and **XML/XSLT**.
- Collaborated with onshore and offshore teams in **daily scrums**, sprint reviews, and release planning sessions using **GitHub** and **Azure DevOps** for version control and deployment.
- Followed **Service-Oriented Architecture (SOA)** principles to ensure modularity and scalability of system components.

Tech Stack: .NET Framework, ASP.NET MVC 5, ASP.NET Core, C#, ADO.NET, Entity Framework, Angular 4, HTML5, Bootstrap, CSS3, AJAX, Azure, LINQ, XML/XSLT, MS SQL Server 2016, GitHub, Agile/Scrum, Windows.
