

SUMMARY

- Data Analyst with 5+ years of experience in **data extraction, analysis, visualization, and reporting**.
- Adept at translating complex datasets into actionable insights that support business goals and drive strategic decision-making.
- Skilled in leveraging **SDLC, Agile, and Waterfall methodologies** to ensure timely delivery of analytics projects.
- Expert in data manipulation and statistical analysis using tools such as **Python (NumPy, Pandas, Matplotlib, Seaborn, SciPy), R (ggplot2), and Plotly**.
- Proficient in creating dynamic dashboards and data visualizations using **Tableau, Power BI, and Excel**, enhancing stakeholder understanding and engagement.
- Hands-on experience with cloud platforms (**AWS, Azure, GCP**) and proficient in querying relational (**MySQL, SQL Server**) and **NoSQL (MongoDB)** databases for scalable, real-time data solutions.
- Strong communicator and team player with a passion for using data to solve real-world problems and optimize business performance.

SKILLS

- **Methodologies:** SDLC, Agile, Waterfall
- **Language:** Python, R, SAS, SQL, PL/SQL IDEs: Visual Studio Code, PyCharm
- **Packages:** NumPy, Pandas, Matplotlib, Seaborn, SciPy, Scikit Learn, ggplot2
- **ETL Tools:** SSIS, SSRS, Informatica
- **Visualization Tools:** Tableau, Power BI, MS Excel
- **Cloud Technologies:** AWS, Azure, GCP, DataBricks
- **Database:** MySQL, PostgreSQL, SQLite, MS SQL Server, Oracle, MongoDB
- **Version Control Tools:** Git, GitHub, GitLab
- **Other Skills:** Data Cleaning, Data Wrangling, Critical Thinking, Communication Skills, Presentation Skills, Problem- Solving, Data Analytics, Decision-Making, Data Architecture, Data Management
- **Operating Systems:** Windows, Linux, Mac

EDUCATION

- Masters of Science in Computer Science, New York Institute of Technology, New York,
- Cloudera Certified Associate (CCA)|Data Analyst Microsoft Certified:Data Analyst Associate (Power BI)

EXPERIENCE

Johnson & Johnson
Data Analyst

Jan 2025 – Present

- Collaborated with cross-functional teams to define and implement **KPIs** for clinical trials, manufacturing, and supply chain, resulting in improved process transparency and reporting.
- Designed and maintained automated dashboards in **Tableau and Power BI**, enabling stakeholders to monitor real-time clinical operations and trial performance.
- Cleaned, transformed, and integrated large datasets from **SAP, Salesforce, and internal sources**, improving data accuracy and reducing manual reporting **by 40%**.
- Utilized **Python (Pandas, NumPy, Matplotlib) and SQL** to perform exploratory data analysis (EDA), identify performance gaps, and support root cause investigations.
- Developed and scheduled **ETL pipelines** using **AWS (S3, Redshift, Athena)** to centralize fragmented datasets and streamline business reporting.
- Conducted compliance and **audit support** analysis, ensuring adherence to internal quality standards and external regulatory requirements.
- Provided ad hoc data reports and visualizations to enhancing decision-making for strategic initiatives and clinical project execution.
- Participated in **Agile ceremonies** and **sprint planning** to ensure timely delivery of data products and updates.

Centene
Data Analyst

May 2022 – Dec 2024

- Collaborated within **Agile teams** to deliver iterative data solutions aligned with business goals.
- Developed scalable ETL workflows using **Informatica, automating data integration across claims, enrollment, and member systems.**
- Designed data models and built dashboards in **Tableau and Power BI**, delivering real-time insights on provider performance and utilization.
- Migrated on-prem infrastructure to **AWS, leveraging S3, Redshift, and Athena** to reduce query costs and enhance scalability.
- Utilized **Apache Spark and DataBricks** for large-scale processing of member health records and cost data.
- Conducted statistical analyses to evaluate **A/B test** results on digital outreach strategies, supporting personalized care initiatives.
- Built **ML models** that improved the accuracy of disease risk predictions **by 25%**, using **Python's Scikit-learn.**
- Streamlined GitLab-based **CI/CD workflows**, improving code release frequency and collaboration.

Cisco
Data Analyst

Feb 2019 – Dec 2020

- Designed and deployed data pipelines using **Python and Hive**, improving ETL process efficiency **by 35%.**
- Performed exploratory data analysis (**EDA**) on customer usage data to support product development and customer success teams.
- Built interactive **Power BI dashboards** to monitor hardware failure rates and logistics **KPIs.**
- Integrated **Azure and Google BigQuery** into data ecosystems, enabling faster cloud analytics and improved decision-making.
- Applied K-means clustering for customer segmentation using R, driving a **15%** lift in campaign performance.
- Wrote complex **SQL/PLSQL** queries to extract insights from large relational databases.
- Translated technical findings into stakeholder-ready reports and insights to support executive decisions.

HDFC ERGO Health
Jr. Data Analyst

Aug 2018 – Jan 2019

- Supported reporting and analytics functions for **claims** and underwriting departments.
- Used **SQL and Excel** to analyze customer behavior and claims data, identifying trends and inconsistencies.
- Created automated dashboards for insurance **KPIs using Power BI**, improving visibility for leadership.
- Assisted in risk profiling models for underwriting using statistical techniques in **R.**
- Participated in **data cleansing** projects that improved data quality for policy issuance workflows.
