EDUCATION

Georgia State University, Atlanta, Georgia

December 2025

Master of Science in Computer Science

GPA: 3.67

Courses - Database Systems, Mobile Computing Wireless Networks, Web Programming, Secure & Private AI, Privacy Aware Computing, Data Security, Network Security.

Koneru Lakshmaiah University, India

May 2024

Bachelor of Technology in Computer Science

GPA: 3.6

Courses - Data Structures, OOPS, Big Data Analytics, Big Data Optimization, Graph & Web Analytics, Compiler Design, Computer Organization & Architecture, Operating Systems, Software Construction, Mathematics, Artificial Intelligence, Data Science, Cloud Computing.

WORK EXPERIENCE

IETE | AI & ML Intern

Jan 2024 - June 2024

- Designed and implemented a secure AI-based image-hiding system by integrating Convolutional Neural Networks (CNNs) with symmetric key cryptographic techniques. This system enabled the concealment of sensitive images within cover images, offering a robust approach for privacy-preserving data transmission.
- Applied deep learning models for steganography and cryptographic encryption, enhancing the accuracy of hidden image retrieval and resistance to potential attacks. The model leveraged advanced image processing methods to preserve visual quality while maintaining data integrity during encoding and decoding.
- Improved encryption efficiency and concealment reliability by optimising the model pipeline with AI-driven enhancements, enabling real-time processing and minimising distortion. This innovation supported secure communication in areas like defence, digital watermarking, and confidential media storage.

ACADEMIC PROJECTS

LIFECRAFT – Conway’s Game of Life Simulator | PHP, MySQL, HTML, CSS, React

2025

- Built a responsive simulator with user/admin login, session tracking, and protected dashboards. Added theme toggling, population stats, and real-time grid logic with smooth animations. Deployed on GSU CODD using PHP for backend and React + CSS Grid for UI.

Defending Privacy Against More Knowledgeable Membership Inference | Python, PyTorch, NumPy

2025

- Analyzing machine learning models’ vulnerability to membership inference attacks and benchmarking four defense mechanisms (DB, DP, DC, GA) across CIFAR-10, CIFAR-10C, and MNIST using accuracy, precision, recall, F1 score, and ROC AUC to guide privacy-preserving AI practices.

Advanced Library Management System | SQL, Python, React

2024

- Built modernised library operations by creating a streamlined, user-friendly Library Management System. The system offers practical opportunities to apply database design, software development, and user interface principles.

Music Popularity Predictor | Machine Learning

2023

- Provide recommendations to the music director on various aspects of music and identify which types of music are gaining popularity. Used Acoustic Ness, Danceability, Duration, Energy, Instrumentalness, Key, Liveness, Mode, Speechiness, Tempo, Time Signature, Valence, Genre, and Artist attributes. Random Forest Classifier gave the best results.

GRE Analyser | DBMS, PHP, MySQL, HTML, XAMPP

2023

- Developed a GRE Analyser system where users can create an account, input their GRE scores, and receive recommendations for universities based on historical trends and current cutoffs. Implemented using ER Diagram, HTML, SQL, and CSS for database design, front-end, and back-end development.

CERTIFICATIONS

- Salesforce Certified Administrator**
Validated expertise in configuring, managing, and optimizing Salesforce applications for business efficiency.
- Salesforce Certified Platform App Builder**
Validated ability to design and deploy custom Salesforce apps using declarative tools, data modelling, process automation, and app security.
- Microsoft certified Azure Fundamentals(AZ - 900)**
Validates foundational knowledge of cloud concepts, Azure services, and cloud security principles.
- Microsoft certified Azure Developer Associate(AZ - 204)**
Demonstrates skills in designing, building, and deploying cloud-based applications using Microsoft Azure.
- ServiceNow Certified System Administrator**
Confirms expertise in managing and configuring the ServiceNow platform, including core ITSM processes.
- Oracle Certified OCI Data Science Professional**
Certifies proficiency in building, training, and deploying machine learning models on OCI.

TECHNICAL SKILLS

Programming Language: Python, Java, JavaScript, C++, SQL, C, Data structures & Algorithms.

Libraries & Frameworks: Node.js, Spring Boot, React.js, Flask, NumPy, Pandas

Tools & Technologies: HTML, CSS, JSON, XML, Postman, AWS

Data Visualisation: Power BI, Tableau

LEADERSHIP SKILLS

- Graduate Teaching Assistant for Principles of Computer Science** **2025**
Support course delivery by conducting lectures, preparing instructional materials, and facilitating assessments in coordination with the professor.
- Campus Engagement** - Coordinated university events at KL University, overseeing logistics and approval processes, while actively volunteering across multiple student-led initiatives throughout my bachelor’s program.
