Objective

Detail-oriented and analytical Business Analyst with a strong foundation in business administration, data analysis, and strategic management. Experienced in process optimization, project management, and stakeholder collaboration to drive business growth and efficiency. Seeking a Business Analyst role to apply data-driven insights and problem-solving expertise to enhance decision-making and operational performance.

Education

Master of Business Administration (MBA)

Campbellsville University, Kentucky (2024-2026)

Concentration: Information Technology

Master of Science in Production Engineering (MS)

University of Colorado, Denver CO (2023)

Specialization: Pedagogy and Post-Production

Bachelor of Business Administration (BBA-IT)

St. Joseph's College, Hyderabad, India (2019)

Core Competencies

- **Business & Data Analysis** – Experienced in leveraging data insights for decision-making, optimizing workflows, and improving business performance.
- **Process Improvement** – Skilled in identifying inefficiencies and implementing solutions to enhance productivity and cost-effectiveness.
- **Project Management** – Adept at managing cross-functional projects, ensuring timely delivery and budget adherence.
- **Stakeholder Engagement** – Strong communicator, able to collaborate with project stakeholders and teams across departments to align business goals.
- **Market Research & Competitive Analysis** – Ability to assess market trends and analyze competitor data to drive strategy.
- **Technical Proficiency** – Experienced with writing SQL queries, Excel (Pivot Tables, VLOOKUP), Power BI and Tableau reporting tools, and CRM systems for data visualization and reporting.

Certifications & Training-

- **Certified Scrum Master (2025)**
 - **Certified Product Owner (2025)**
-

Technical Skills

- **Business Intelligence:** SQL, Tableau, Power BI, Excel (Pivot Tables, VLOOKUP)
 - **Data Analysis & Visualization:** Google Analytics, CRM Systems, Data Reporting
 - **Project Management:** Agile methodologies, Jira, Scrum frameworks
 - **Process Optimization:** Workflow automation, Lean methodologies
-

Professional Experience

Director

Bach to Rock, McKinney, TX

July 2024 – Present

As the Director at Bach to Rock, McKinney, was responsible for managing and streamlining business operations, optimize business processes and improving financial performance. Managed daily operations while acting as the primary point of contact for stakeholders, IT teams, accounting teams, and in-house staff. Experience on the project included collaborating with IT, helping in development of our LMS & CRM system updates and processes, while working with accounting to manage billing, payroll, and financial reporting.

Key Responsibilities:

- Analyzed **operational performance metrics** to optimize workflows and improve customer engagement.
- Developed data-driven marketing strategies, resulting in **20% enrollment growth** within the first quarter.
- Conducted **market research and competitor analysis**, identifying opportunities for expansion.
- Implemented **process improvements** that enhanced team efficiency and reduced operational costs.

Business Analyst & Audio Operations Manager
Halcyon Productions, Aspen, CO
June 2023 – June 2024

As a Business Analyst and Audio Operations Manager, was responsible for overseeing project management while analyzing business operations to maximize efficiency and RoI. Also worked with stakeholders, production teams, and clients to optimize workflows, manage budgets, and enhance service delivery. Coordinated with IT and finance teams to implement system improvements and track key performance metrics.

Key Responsibilities:

- Led **data-driven decision-making processes**, analyzing key business performance indicators.
- Managed **budgets and resource allocation**, improving cost-efficiency across multiple projects.
- Spearheaded client relationship strategies, enhancing customer retention and contract renewals.
- Developed reports and dashboards using **Excel and Power BI** to track project progress.

Junior Business Analyst
TCS (India)
Jun 2019 – July 2021
Location: Hyderabad, India

As a Junior Business Analyst at TCS, our project dealt with streamlining a Purchase Order Tracking System for a manufacturing client to increase efficiency of order processes. This comprised of helping gather requirements, document workflows, and identifying issues in the existing system. Working closely with developers, contributed to designing automated status updates and enhanced reporting dashboards. Analyzed order data using Excel and SQL to pinpoint bottlenecks and improve tracking accuracy. Participated and sometimes led Agile meetings, assisted with UAT testing, and helped train end-users. These improvements made order tracking smoother, reduced delays, and improved supply chain visibility.

Key Responsibilities:

- **Data Entry & Report Generation:** Assisted senior analysts by inputting data into Excel and Google Sheets. Prepared basic reports to track key performance indicators (KPIs) such as sales growth, customer engagement, and product usage.
- **Requirement Gathering:** Supported Agile software development teams in gathering business requirements for new projects by conducting interviews with

stakeholders and documenting their needs. (FRDs, user stories, etc). Supported Agile processes by conducting ceremonies such as Sprint Refinement and Sprint Planning.

- **Process Documentation:** Helped document and organize business processes by creating flowcharts using basic tools like MS **Visio** or **Lucidchart**. This included mapping out how different departments interact with systems and identifying bottlenecks in workflows.
- **Data Analysis:** Performed data analysis using Excel, such as generating pivot tables, basic statistical analysis, and creating simple charts to visualize trends and performance.
- **Customer Feedback Analysis:** Assisted in reviewing customer feedback from surveys, emails, or social media and summarized findings for the team to prioritize product improvements or service enhancements.
- **Support in Agile Environment:** Participated in Agile sprints and took notes during meetings. Helped update the project management tool (e.g., **JIRA** or **Trello**) by tracking task progress and ensuring deadlines were met.
- **Streamlined Data Reporting:** Assisted in the creation of a weekly sales report, which helped senior management track performance more efficiently, saving approximately 5 hours of manual reporting each week.
- **Improved Stakeholder Communication:** Helped organize and track requirements for a customer service improvement project. The project was completed on time and improved customer satisfaction by 8%.
- **Process Mapping Efficiency:** Contributed to process flow diagrams that were used in a larger process optimization project, helping identify inefficiencies in the order processing system.

Market Analyst & Digital Strategy Consultant (Freelance, Various Clients)

(2018 – 2022)

- Conducted **market analysis and performance tracking** for multiple brands, optimizing marketing investments.
- Designed and implemented data-driven marketing campaigns that **increased customer engagement and revenue**.
- Provided **business insights and reporting** using Excel and CRM tools to improve decision-making.

Technical Skills

- **Business Intelligence:** SQL, Tableau, Power BI, Excel (Pivot Tables, VLOOKUP)
- **Data Analysis & Visualization:** Google Analytics, CRM Systems, Data Reporting

- **Project Management:** Agile methodologies, Jira, Scrum frameworks
- **Process Optimization:** Workflow automation, Lean methodologies
