Target Roles: Technical Business Analyst | Data Analyst | BI & Reporting Specialist | SQL/Power BI Expert | Application Support Engineer

PROFESSIONAL SUMMARY

Dynamic and results-oriented Software Engineer with 5+ years of experience in designing data pipelines, enhancing enterprise systems, and building BI dashboards to support executive decision-making. Proven ability to bridge the gap between business needs and technical implementation in Agile environments. Proficient in SQL, IBM DB2, Power BI, Cognos and SAP BusinessObjects. Adept in data integration, stakeholder collaboration, and end-to-end project delivery.

TECHNICAL SKILLS

- **Databases:** SQL Server, IBM DB2, Oracle, PostgreSQL, MS Access, PL/SQL
 - **Languages:** Java, SQL, Python, HTML/CSS, JavaScript (Basic)
 - **Frameworks/Tools:** Spring Boot, REST APIs, JUnit, Maven, Git, SSIS
 - **File/Server Tools:** PuTTY, WinSCP, FileZilla
 - **Business Intelligence & Visualization:** Power BI (DAX, Power Query), IBM Cognos, SAP BusinessObjects, SAP Analytics Cloud, SSRS, Crystal Reports
 - **ETL & Automation Tools:** SSIS, SAP BODS, Power Automate, Custom Scripted ETL Pipelines
 - **Data Modeling & Reporting:** KPIs, Dashboards, Scorecards, OLAP Cubes, SAP Universes, Data Warehousing, Data Marts
 - **Development & Platforms:** Visual Studio, Eclipse, Information Design Tool (IDT), SharePoint, ServiceNow, JIRA
 - **Documentation & Analysis:** Business Requirement Documents (BRDs), Functional/Technical Specification Documents (FSDs/TSDs), Test Plans, Mapping Sheets, Use Cases
 - **Methodologies:** Agile (Scrum), Waterfall, SDLC, DevOps
-

PROFESSIONAL EXPERIENCE

Senior Data Analyst / Team Lead – HR & Payroll Systems

Stellantis – Michigan, MI | July 2022 – Present

- Led a cross-functional team supporting HR/Payroll web applications used by 60,000+ hourly employees across the U.S.
- Directed a team of 5 developers in supporting and enhancing a full-stack application with an **Angular frontend**, **Java backend**, and **IBM DB2** database.
- Used **GitHub** for version control: created and reviewed **pull requests**, approved code changes, and maintained clean deployment pipelines.
- Employed **WinSCP**, **PuTTY**, and **FileZilla** to manage secure file transfers, connect to remote servers, and support Linux-based batch processing jobs.
- Gathered and analyzed business requirements, coordinated offshore development tasks, and ensured timely and compliant delivery of system enhancements.
- Built and consumed **REST APIs** to integrate third-party systems (e.g., symmetric forms) with internal applications.
- Wrote, tuned, and optimized complex **SQL queries**, views, and stored procedures in IBM DB2 to support business reporting and data validation.
- Developed and deployed **Power BI dashboards** and **Cognos reports** to visualize payroll performance, PTO trends, and W2 generation metrics.
- Automated recurring **cron jobs** to streamline batch processing and reduce manual intervention across environments.
- Designed robust **data pipelines** to ensure accuracy and compliance in payroll operations for multiple union-based pay groups.
- Acted as the **Subject Matter Expert** for union-related payroll and data discussions, supporting internal audits and collective bargaining requirements.
- Improved operational efficiency by **reducing manual reporting efforts by 35%** through automated solutions and proactive system monitoring.

Key Tools: Java, Angular, IBM DB2, SQL, Power BI, Cognos, REST APIs, GitHub, WinSCP, PuTTY, FileZilla, Cron, SharePoint

Business Analyst

Stellantis – Michigan, MI | May 2021 – June 2022

- Acted as liaison between business stakeholders and the offshore technical team to gather, clarify, and document detailed functional requirements for system enhancements and new feature development.
- Conducted regular meetings and requirement walkthroughs with business users to ensure alignment on project scope, priorities, and timelines.
- Translated business needs into clear, actionable user stories and use cases, and collaborated with developers to implement the changes effectively.
- Managed enhancement requests and change demands submitted via ServiceNow, ensuring timely triage, prioritization, and resolution tracking.
- Led daily status calls with offshore team to review progress, remove blockers, and provide updates to stakeholders.
- Coordinated user acceptance testing (UAT) by preparing test scenarios and collecting feedback for iterative improvements.
- Maintained comprehensive documentation including business process flows, requirement specifications, and impact analysis reports.
- Supported post-deployment validations and issue triaging, ensuring smooth transitions from development to production.

Key Tools & Skills: ServiceNow, JIRA, Confluence, MS Excel, Agile, SDLC, Requirement Gathering, UAT, Offshore Coordination, Documentation

Database Analyst / Junior BI Developer

1099 Data Solutions – Wisconsin, IL | Aug 2020 – Apr 2021

- Designed KPIs and dashboards for Finance and Supply Chain leadership using Power BI and Business Objects.
- Worked with ETL teams using SSIS and BODS to build reusable data marts and cubes.
- Evaluated and documented BI platforms (Power BI, SAP Analytics Cloud, Tableau) for internal review.
- Authored comparative whitepapers and architectural models to guide future BI strategy.

- Delivered technical artifacts (blueprints, data models, diagrams) for leadership alignment.
Key Tools: Power BI, SAP Analytics Cloud, IBM Cognos, SSIS, Crystal Reports, BusinessObjects, Data Modeling
-

EDUCATION

Master of Science in Data Science (In Progress)

University of the Cumberlands – KY

Bachelor of Science in Computer Science

East-West University – Chicago, IL

CERTIFICATIONS

- **Stanford Online – Databases: Relational DB & SQL**
 - **SQL for Data Analytics**
 - **Microsoft Certified – Power BI Desktop**
 - **AWS Developer – Building on AWS**
 - **AWS Basics – Intermediate Level**
-

CORE STRENGTHS

- ✓ Advanced SQL for ETL, validation, and reporting in HR/Finance domains
- ✓ Expertise in Power BI, IBM DB2, SAP BO, Cognos, SSRS
- ✓ Proficient in Agile methodology, sprint planning, UAT, and stakeholder engagement
- ✓ Strong data storytelling through dashboards, scorecards, and KPIs
- ✓ Experience in API integration, Java/Angular support, and production triage
- ✓ Strong documentation, cross-functional collaboration, and process automation
