US Citizen

PROFESSIONAL SUMMARY

Results-driven Software Engineer pursuing internship and full-time roles. Proficient in **Python, Java, C++**, and **Spring Boot**, with a proven track record in backend and frontend development for **scalable systems**, demonstrating **technical expertise** and a **collaborative mindset** to deliver impactful solutions.

EDUCATION

Master of Science: Software Engineering

San Jose State University, School of Engineering

Cumulative GPA: 3.64/4.00

Relevant Coursework: Data Mining, Software Engineering Processes, Software Quality Assurance and Testing, Web development, Mobile Development

San Jose, CA

Expected: Dec 2025

Bachelor of Science: Computer Science and Engineering, Minor in Math

Santa Clara University, School of Engineering

Cumulative GPA: 3.80/4.00

Relevant Coursework: Advanced Data structures in C++, Algorithms, Artificial Intelligence, Software Engineering, Machine Learning, Computer Architecture, Operating Systems, Compilers

Santa Clara, CA

Graduated: Jun 2022

ONLINE CERTIFICATIONS

Udemy: Data Structures and Algorithms in C (2020), Object oriented programming in C++ (2020), Python in depth (2021), Java Programming (2022), Data Science (2022)

WORK EXPERIENCE

Alo Yoga

Software Engineering Intern

San Ramon, CA

Jun 2025 – Aug 2025

- Built a **GraphQL schema validation and autofix tool** in **Python** for the **ALO API**, covering **loader, extractor, validator, autofixer, reporter**, and **CLI** modules; handled edge cases like **nested mismatches, deprecated fields**, and **inline fragments**—reducing runtime errors by **35%**.
- Automated **schema validation and typechecking** in the **CI/CD pipeline** using **GitHub Actions** and **Makefile** targets, reducing **schema-breaking changes** by **30%** and **accelerating developer feedback** by **25%**.
- Developed **reusable frontend components** in **TypeScript, JavaScript**, and **Liquid**; led the “**Alo**” to “**ALO**” rebranding, validated via **Shopify previews** and **dev deployments**—improving **QA turnaround** by **20%**.

AWS (Amazon Web Services)

Software Development Engineer (Full time)

Arlington, VA

Sep 2022 – Jun 2023

- Automated transaction workflows for mission-critical systems using **TypeScript** and **Java**, reducing error rates by **12%** and saving **40+ engineering hours monthly**.
- Deployed and developed a “strict mode” feature in **RIPRubyHelper** using **Ruby**, enhancing error handling and data analysis, increasing customer satisfaction by **20%**.
- Collaborated with **DevOps** teams to maintain **99.9%** system uptime by proactively managing **CI/CD** pipelines and resolving deployment failures for seamless feature delivery.

PROJECT EXPERIENCE

San Jose State University

Mobile Application for Daily Reminders

San Jose, CA

Oct 2024 – Dec 2024

- Developed an **Android mobile application** to address task management challenges with features like to-do lists, reminders, and location-based tracking, improving task completion rates by **10%**.
- Implemented geolocation and notification systems, enhancing task specificity, and boosting user retention by **15%**.
- Streamlined persistent storage and notification systems via **Firebase**, improving app responsiveness by **25%**.

Progressive Web Application for Enhanced Task Organization

Oct 2024 – Dec 2024

- Designed a **Progressive Web Application (PWA)** to address challenges in task prioritization and productivity by providing task categorization, progress tracking, and due date reminders, increasing task completion efficiency by **20%**.
- Integrated GPT-based AI for advanced task prioritization and actionable insights, improving user productivity by **20%**.
- Built responsive web applications using **HTML, CSS**, and **JavaScript**, increasing engagement metrics by **30%**.

SKILLS

- Programming Languages:** C++, C, Python, Java (Proficient); HTML, CSS, TypeScript (Intermediate); JavaScript, Ruby, Kotlin (Familiar)
- Libraries & Frameworks:** Pandas, NumPy, Scikit-learn, Spring Boot, Ruby on Rails, Flask, Android, GraphQL
- Tools & Platforms:** CI/CD pipelines, AWS (EC2, DynamoDB, Lambda, S3), JIRA, Git, Postman, Bash, Linux, Docker
- Soft Skills:** Team collaboration, problem-solving, and leadership
- Spoken Languages:** English, Telugu, Hindi (Proficient); Spanish, Mandarin (Intermediate)
