

Vivek Reddy Shreepathi
Fullstack Java Developer
vivek.reddy.shreepathi.java@gmail.com
(469) 909-0080

PROFESSIONAL SUMMARY:

- 7+ years of professional experience in IT industry and Expertise in Object Oriented Analysis (OOA) including development, implementation, testing of various applications using Java, J2EE.
- Good knowledge in working with IOC frameworks like Spring and Spring AOP, ORM frameworks like Hibernate, JPA and MVC framework like struts.
- Worked on UI testing with Karma, Jasmine, and Protractor for Angular JS.
- Experience managing/scale/deploying applications to Pivotal cloud foundry.
- Experience in Microservices-Spring Boot, Pivotal Cloud Foundry (PCF) and Engagement using Spring Boot.
- Experience in Configuration management using Amazon Cloud Formation, Continuous integration with Jenkins and Bamboo. AWS management (EC2, EBS, ASG, RDS, R53).
- Successfully designed and developed Java Multi-Threading based collector parser and distributor process, when the requirement was to collect, parse and distribute the data coming at a speed of thousand messages per seconds.
- Knowledge in Unified Modeling Language (UML), Flow Chart, Class Diagrams, User Diagram, Activity and Sequence Diagrams.
- Experience in working, setting up the CI/CD pipelines using Jenkins by writing Groovy scripts and integrating the pipeline with GIT, Bitbucket, SVN and with Maven for build automation.
- Involved in Various Stages of Software Development Life Cycle (SDLC) deliverables of the project using the AGILE Software development methodology.
- Experienced in working with web server applications like IIS, Apache, and Tomcat, including Linux-based upgrades and deployments.
- Expertise working with Application Servers like IBM WebSphere 7.x/6.x, Tomcat 7. x.
- Experience in Message Oriented Middleware implementation using JMS and Apache Kafka.
- Good experience with source control tools like GIT, SVN, CVS and JIRA for issue tracking along with logging tools like Log4J.
- Good experience in implementing IOC and Dependency Injection features in various aspects of Spring Framework (Core, Web, JDBC, MVC, and DAO) and experience in integrating Spring Web Flow with other frameworks like JSF.
- Experience in developing SPA based on unidirectional flow applications using React- Redux and Node.JS.
- Experience in using React.JS with typescript including components, Forms, Events, Keys, React Router, plus Redux, Animations and Flux concept.
- Experience in working with third party web services APIs and Web Services using AJAX and JQUERY. Expertise in consuming Web services including different technologies and standards like SOAP, Restful API calls on server side.
- Designed and developed various integration components using JMS and MQ Series.
- Experience of working and resolving issues while doing production support.
- Expertise in designing and deploying multi-tier web applications using J2EE technologies like Java, J2EE, Spring 3.x, Struts 1.x and 2.x, JDBC, EJB, SOAP and Rest Web services, XML and front end like Angular, Ajax, Node JS, JavaScript, bootstrap, HTML when working as a Full stack developer.

Technical Skills:

Languages	Java
Frameworks	Spring (Spring boot, IOC, MVC, ORM, JDBC), Struts and Hibernate
Web Services	SOAP and REST
Spring Frameworks	Spring Core, Spring DAO, Spring AOP, Spring MVC, Spring Boot, Spring RMI, Spring Web, Spring IOC, Spring JDBC, Spring ORM and Spring JMS
Web Technologies	HTML, Angular 2/4/6, JSON, React, CSS, DHTML, Servlets, JSPs, EJB jQuery, Ajax, AngularJS,
Databases	Oracle, SQL Server, MySQL, Sybase, DB2 and NoSQL (mongo, Cassandra)
Cloud	AWS
Version Control tools	GIT and Bit-Buckets
J2EE Technologies	Servlets, JSP, SOAP, REST, WSDL, XML over HTTP, Apache CXF, JAX-B, XSD and RESTFUL, JNDI, JDBC, Struts, JMS, Java Beans, Transaction Management, Resource Connections, Security, Spring, Hibernate JAX RPC, JAX-RS, JAX-WS
Application Servers	Apache Tomcat, JBOSS
Tools & technologies	ANT, Maven, JIRA, GIT, Bit-Bucket

Education:

Master's in Computer and Information Science from Texas Tech Univeristy

PROFESSIONAL EXPERIENCE:

US Bank, Minneapolis, Minnesota

Septemeber 2023 – Present

Title: Full-Stack Developer

Responsibilities:

- Involved in SDLC Requirements gathering, Analysis, Design, and Development, testing production of application using Agile methodology.
- Implemented Object-relation mapping in the persistence layer using Hibernate framework in conjunction with spring functionality.
- Used Spring Data JPA as the ORM framework to connect with MYSQL database.
- Developed server-side application to interact with databases using Spring Boot and Hibernate.
- Extensively used React-Router techniques Axios service to retrieve data from server synchronously.
- Implemented RESTful and SOAP-based Web Services, utilizing Soap UI for testing
- Developed multiple enterprise applications using Spring Boot, Hibernate framework, Spring IOC, Spring MVC, Spring JDBC, Spring Annotations, Spring AOP, Spring Integration, frameworks, RESTful webservice.
- Implemented Restful web services which produces both XML and JSON files to perform tasks, RESTful web service using Jersey for JAX-RS implementation, which leveraged both web & mobile applications.
- Worked extensively on Spring Security using JWT and OAuth token-based authentication.
- Worked on programming, including object-oriented principles, data structures, and algorithms.

- Automated build processes using Grunt for task automation, minification and execution of unit test cases.
- Involved to implement various screens for the front end using React.js and used various predefined components from NPM (Node Package Manager) and redux library.
- Integrating JPA persistence using Hibernate to save the current state of the drool's knowledge session using the Spring Framework.
- Developed Responsive Web Pages using Angular 18, HTML, CSS and JavaScript, Typescript.
- Developed and maintained scalable RESTful API's using Node.js and Express.js serving data to Angular front end across multiple modules and features.
- Integrated Node.js backend with Angular applications using RESTful endpoints and HTTP Client for real time CRUD operations.
- Implemented pagination, sorting and filtering API's consumed directly by Angular tables and dashboards.
- Created and implemented Oracle Stored Procedures, Functions, Triggers and complex queries using SQL and PL/SQL as well as query optimization.
- Worked with Java Messaging Services JMS for reliable and Asynchronous Communication.
- Developed a reusable React component using Material UI, featuring Buttons, Checkboxes, Inputs, Icons, Toggles, Dropdowns, and Multi-level Dropdowns, and more to enhance user experience.
- Stimulated asynchronous api communication with Kafka.
- Designed and developed Micro Services based business components and RESTful service endpoints using Spring Boot.
- Involved in creating and Deployment of REST API and Micro services in Java J2EE using Spring Boot.
- Responsible for creating Batch processes using different modules of Spring Boot like Spring Boot Batch, Spring data etc.
- Used JSP for presentation layer, entity beans as the model to represent the persistent data and interacted with Oracle database as per MVC Architecture.
- Implemented Routing to navigate between the components using Angular Router module.
- Led end to end cloud migration projects, migrating on premises applications and databases to AWS using services such as AWS application migration services (MGN) and AWS database Migration Service (DMS).
- Designed and implemented Secure, scalable AWS cloud infrastructure S3 to support migration efforts and optimize performance.
- Collaborated with cross functional teams to ensure seamless application refactoring and modernization during cloud migration, leveraging AWS lambda and containerization technologies.
- Developed the application using Singleton, Business Delegate and Data Transfer Object design patterns in the project.
- Used SQL Queries in Java code to do select/update/delete depending upon the business requirement.
- Used AWS Beanstalk for deploying and scaling web applications and services developed with Java.
- Used J Boss application server for the deployment of web apps and involved in remote server deployment and remote debugging.

Environment: Java JDK1.8, JSP, Struts 1.3.8, CMS, Eclipse 3.2 Spring 1.0.2, Angular 9, SOAP Web services, SOA, JavaScript, CSS, XML, JAXB XHTML, XSLT, Hibernate, Web Services, WSDL, JBoss 5.x, JMS, Ajax, Hibernate 2.1, EJB, Log4j, Oracle 9i/10g, Web Sphere 6.1, AWS, Ant.

Cencora, Conshohocken, Pennsylvania

July 2020- August 2023

Title: Full Stack Java Developer

Responsibilities:

- Used Micro service architecture with Spring Boot based services interacting through a combination of REST and Apache Kafka message brokers.
- Configured and implemented WEB Servers based on Linux Apache Tomcat.
- Used Spring Boot which is radically faster in building cloud Micro Services and develop Spring based application with very less configuration.
- Developed and maintained Spring Boot applications, using Spring Boot Actuator to externalize configuration properties for multiple environments.
- Implemented REST APIs using Spring REST and RestTemplate, with Hibernate ORM for database interactions and transaction management.
- Designed and optimized SQL and PL/SQL queries for Oracle and leveraged Hibernate caching and batch transactions for performance.
- Built server-side applications with Spring Boot and Hibernate, implementing Dependency Injection for maintainability.
- Created React.js and React Native front-end applications with ES6 features, Redux, Virtual DOM, and JSX for responsive UI/UX.
- Worked extensively with AJAX, HTML5, CSS3, JavaScript, and jQuery for interactive, dynamic front-end functionality.
- Implemented Angular Promise API and integrated RESTful backend services with modern UI frameworks.
- Migrate legacy class based React codebase to modern functional components with React hooks improving performance and readability.
- Configured CI/CD pipelines with AWS Code pipeline, Code Build and Jenkins to automate testing and deployment of Spring Boot Applications.
- Created RESTful API's using Spring Boot and exposed them via AWS API Gateway with JWT-based authentication and rate limiting.
- Used GIT and Bitbucket for version control, with Jenkins CI/CD pipelines for automated builds, deployments, and scheduled overnight builds.
- Configured Terraform scripts to provision AWS resources such as API Gateway, IAM Roles/Policies, and DynamoDB tables.
- Containerized applications with Docker, writing Dockerfiles to build and deploy Docker images.
- Followed Agile methodology, collaborating with clients for requirement gathering, feedback loops, and implementing optimal solutions.
- Involved in code reviews, bug fixing, and close collaboration with cross-functional teams to ensure issue resolution.
- Developed the User Interface (UI) components using Angular 13, Typescript, HTML, CSS, and UI component library Angular Material.
- Used React.JS library functions for the logical implementation part at client side for all the application.
- Designed front-end presentation logic using JSP, CSS3 and Strut tags.
- Implemented client-side validations using JavaScript. Developed various generic JavaScript functions for validation.

- Authored and maintained technical documentation, project plans, and UI specifications throughout the SDLC.
- Developed ANT build scripts to generate JAR files for deployments.
- Monitored and optimized performance of both client-side and server-side applications to meet SLA targets.
- Designed and developed RESTFUL web services using Spring Boot.
- Used JPA annotations to map with database tables using Hibernate. Used HQL Hibernate Query Language and Criteria API for database querying and retrieval of results.
- Used Spring Framework based on MVC Model View Controller architecture in Web Sphere Application Development.

Environment: Java 8, J2EE, Spring Boot 1.5, Spring Data JPA, Spring 4.0, Spring Cloud, Apache Tomcat, RESTful Web Service, MySQL, HTML5, CSS3, bootstrap 3, React JS, JavaScript, GIT, JMS, Agile, Log4j, Maven, AWS, Docker, Jenkins, Postman.

Geico, Chevy Chase, Maryland

Mar 2018- June 2020

Title: Java/J2EE Developer

Responsibilities:

- Involved in various SDLC phases like Requirement gathering, Design, Analysis and Code development.
- Developed the Spring Features like Spring MVC, Spring Boot, Spring Batch, Spring Security, and Spring Integration.
- Secured Rest API's by implementing OAuth2 tokens-based authorization schema by Spring Security.
- Created and injected spring services, spring controllers and DAOs to achieve dependency injection and to wire objects of business classes.
- Created Annotated JPA, Entity, POJO classes which are accessed in the data access layer.
- Experience supporting and monitoring IIS servers and Web portal applications.
- Developed internal coding using J2EE technologies based on the MVC Architecture.
- Implemented Business Logic using Java 1.6, Spring 3.1, Struts 2.0 and Hibernate 3.0.
- Involved in the creation of database objects like Tables, Views, and Indexes using oracle tools like PL/SQL Developer.
- Deploying, Scaling, Configuring, and writing manifest file for various Micro services in PCF.
- Implemented Collection Framework and used the Thread, I/O functionalities for meeting access, used Java Lambda Expressions, Stream API, and Functional Interfaces in business logic.
- Converted a monolithic app to micro services architecture using Spring Boot using 12 factor app methodologies. Deployed, Scaled, Configured, wrote manifest file for various Microservices in PCF.
- Designed and developed the REST based Microservices using the Spring Boot, Spring Data with JPA and used Swagger to interact with API end points of the Microservices.
- Developed Business objects using POJOs and data access layer using Hibernate framework.
- Achieved Dependency injection by creating Spring services, Spring controllers and DAOs to wire objects of business classes.
- Implemented DAO pattern to fetch data from database using Hibernate to carry out various database operations and avoid redundant database access statements Involved in configuring XML mapping files and POJO objects.

Environment: Java, Java, J2EE, Servlets, SOAP, HTML, CSS, JavaScript, Ajax, Bootstrap, JSON
