

AGAMJOT SINGH PANESAR

Seattle, WA | 206-756-6868 | agamjotpanesar@gmail.com | linkedin.com/in/agamjot-panesar

EDUCATION

University Of Washington

Masters of Science in Computer Science and Systems

Expected December 2024

GPA 3.87/4.0

Indian Institute of Information Technology

Bachelor of Technology in Information Technology

2018 – 2022

GPA 8.4/10

TECHNICAL SKILLS

- **Skills:** Java, C++, C#, .NET, Javascript, Vue.js, React, Python, NodeJs, Aerospike, MySql, NoSQL, MongoDB, JSON, XML, Java Spring, Docker, Git, Jira, AWS, IAM, Linux, Kubernetes, GCP, Kafka, Jenkins, Visual Studio, CloudEvents
- **Relevant Coursework:** Data Structures and Algorithms, Distributed Systems, Fundamental Software Engineering, Machine Learning, Networking concepts, Operating Systems, Object Oriented Programming

WORK EXPERIENCE

Software Engineer, Seattle, US

May 2024 - Present

Cloud and Distributed Systems (CDS) Research Lab

- Conducted a comprehensive analysis research of serverless application migration between major public FaaS platforms (**AWS Lambda, Google Cloud Functions, Microsoft Azure**) in collaboration with a team of researchers.
- Coordinated with Professor Wes Lloyd and fellow researchers to investigate Serverless Application Portability for event driven workflows between public FaaS platforms by comparing the **performance, cost, and portability** aspects of cloud vendor specific vs. generic event models (**CloudEvents**). Utilizing **C++ and Java** for FaaS platforms.

Software Engineer, India

July 2022 - September 2023

Media.net

- Worked with AdExchange team, responsible for facilitating the real-time buying, selling, and auctioning of ad units.
- Optimized low-latency components of the AdExchange platform, significantly increasing coverage and making it **20%** more scalable and robust to handle a scale of **150 Billion inbound requests per day**, within defined SLAs
- Led research, design, development and maintenance efforts for **web applications and backend** services utilizing Java, **SpringBoot**, JavaScript, and React JS, **virtualization using Docker**, ensuring seamless performance and continuous integration and deployment (**CI/CD**).
- Conducted thorough software testing to identify bugs and demonstrated strong **troubleshooting skills** and telemetry expertise by **addressing application and infrastructure issues**, implanting quick bug fixes and resolved complex technical problems
- Contributed to QA processes, testing, and enhancing functionalities, resulting in a **40% reduction** in bug occurrences, reducing overall **latency by 25%**, **saving 2+ hours** for testers everyday and improved overall product quality.
- Managed and optimised the sanity scripts written in Python. Achieved a **50% reduction** in the **runtime** of regression sanity tests, resulting in saving 10+ hours per week for team members

Software Engineer Intern, India

January 2022 - June 2022

Media.net

- Spearheaded the development of a robust **microservice** in Java to store consented user data within an Aerospike database, catering to client needs and enhancing user targeting capabilities
- Implemented best practices for **monitoring, logging, alerting and configuration** management to ensure systems are up-to-date, stable, and secure.
- Contributed extensively to backend development using **C++, Java, PostgreSQL, MySQL**, and **MongoDB**, while ensuring comprehensive testing with **JUnit 5**.
- Increased the test coverage from **30% to 70%** using JUnit and **Mockito** framework.

Software Engineer Intern, India

May 2021 - July 2021

Media.net

- Designed and implemented a user-friendly **UI** for the admin dashboard web application using **Html, CSS, Typescript, Vue.js, Node.js, ReactJS, and REST API** methods in Java, streamlining entity table modifications and saving 20+ hours per week for developers.
- Engineered an efficient UI solution for comparing JSON files, optimizing **A/B testing** workflows and resulting in saving **60% time** for the product team.

PROJECTS

Business Reviewing App | Python, JavaScript, Vue.js, React, HTML, CSS, AWS | 2024

- Developed an innovative UI to quickly rate businesses with simple “good” or “not good” option.
- Integrated Maps API enabling the users to select different place and leave reviews **saving 60% time per user** to review a place. Leveraged **AWS Lambda** functions written in **Python** for CRUD operations for data stored in MongoDB.
