

Vyshnavi Mallela
mvyshnavidev@gmail.com
252-242-1774
Virginia Beach, Virginia

Professional Summary:

- 4 years of professional experience in System Analysis, Design, Development, Implementation, Enhancements, and maintenance of various applications including Windows, Web and Client/Server Application development using C#.NET,
- ASP.NET, MVC, SQL Server, ADO.NET, ENTITY FRAMEWORK, LINQ, WCF, Web Services, HTML, XML, Java Script, AJAX, Angular and CSS.
- Have a strong knowledge and experience in using Object Oriented Programming Concepts (OOPS) using C#.
- Experience in Designing, development and deployment of high - Performance, Scalable, Distributed, ASP.NET and MVC Applications.
- Experience in database connectivity programming using ADO.NET, Entity Framework and LINQ.
- Development experience with HTML 5, JavaScript, Angular 14+, CSS and ASP.Net for designing the Views, Controller coding.
- Extensively and efficiently used Data Reader and Datasets in ADO.Net to retrieve, display, insert and update data in the database.
- Hands on experience in SQL Server database design, development and in writing Constraints, Indexes, Views, Stored Procedures and User Defined Functions with SQL Server 2019/2016 .
- Worked on LINQ to SQL, LINQ to Objects, LINQ to XML and Lambda expression.
- Worked on binding classes, endpoint communication and creating a programmatically-configured managed application that hosts using Windows Communication Foundation (WCF) services.
- Implemented IT Security Features using ASP.NET Login Controls, OAuth,JWT, Authentication and Authorization.
- Worked on HTML control toolkit and used Script Manager Control and Update Panel control for partial-page update.
- Good knowledge on Windows Presentation Foundation (WPF) in creating Windows based application.
- Good experience in State Management Techniques such as Sessions, Query string, Cookies and Cache etc.
- Used versioning tools Microsoft Team Foundation Server (TFS) for version controlling of the application.
- Good experience in working under tight deadlines. Excellent at solving complex problems under strict deadlines, communication and interpersonal skills.

Education:

Bachelors degree in Electronics and communication .

TECHNICAL SKILLS:

Programming Languages:	C, C++, C# (.Net), SQL.
Microsoft Technologies:	ASP.NET Core 6.0, Microsoft .Net Framework 4.8, 4.6, ASP.NET, MVC 5, ADO.NET.
Frameworks:	Microsoft .Net 7/ 6/ 5, .NET Core 3.1, .NET Core 2.0 Entity Framework, LINQ, Web forms, Win Forms, Web API, WPF, WCF, Web Services
Client-side Technologies:	HTML, CSS, JavaScript, jQuery, Knockout JS, ReactJS, Node.JS, Angular 14+, AJAX, JSON, Typescript, Bootstrap.
Development Tools:	Visual Studio 2022, Visual Studio Code, Orion, American Eagle (CMS), Postman, Microsoft Azure
Databases:	SQL Server 2019/2022, Azure SQL, PostgreSQL, MongoDB.
Operating Systems:	Windows, Linux, MacOS
Web Servers:	IIS
Build Management:	TeamCity, GitHub Actions

Deployment server: Octopus Deploy
Methodologies: UML, Agile Modeling, SDLC model, Waterfall model, Use Cases
Version Control: Team Foundation Server (TFS), Tortoise GIT

Professional Summary:

.Net Developer
Anthem

November 2023 to till date
Norfolk, VA

Roles & Responsibilities:

- Developed the web application using C#.NET, ASP.NET ,ADO.net,Web API and SQL Server.
- Involved in developing the UI pages using HTML5, CSS3, JavaScript, and jQuery,Bootstrap and Angular 14+ for improved user experience.
- Used MVC architecture for client server interaction.
- Gateways Configured the Web. Config file for Session Management and trace.
- Expert in developing Drill through and Drill down reports using Crystal Reports and MS SQL Server Reporting Services SSRS.Tuned and Optimized SQL Queries using Execution Plan and Profiler.
- Writing SSIS packages for ETL and also to export data to Excel for advanced reporting.
- Involved in creating database using SQL Server and have also created stored procedures.
- Developed SQL Server Stored Procedures, Tuned SQL Queries(using Indexes and Execution Plan)
- Used LINQ along with ADO.Net for data retrieving, querying, storage and manipulation of different data sources like XML,SQL.
- Implemented Session state and Cookies for web development and security.
- Designed and Developed Web Services to synchronize data from Remote application database to Online Database using C#.Net, ASP.Net MVC and Visual Studio.Net.
- Defined new validations through Angular 14+ for the form field validation implemented through HTML5.
- Used TFS for integration, code security, and version and source control.
- Created and deployed SSIS packages to production, scheduled them to run on a routine basis, and monitored the error log for errors.
- Developed and consumed Web services for getting health insurance premium quotes, Medicare Supplement Rate quotes, county codes etc.
- Created and optimized views for user interactions using objects of HTML Helper class, Custom Helpers and JavaScript.
- Consumed web services to enable communication between UI and different databases.
- Worked on ServiceNow tool

Environment: NET Framework 4.8/4.7, MS Visual Studio .NET 2022, Entity Framework, C#, VB6, UML, CSS, JavaScript, jQuery, Web API, Linux, Red hat, Angular14+, Node.JS, ReactJS Typescript, RESTful API'S, Microsoft dynamics AX 2009 (ERP), Microsoft Dynamics AX 2012 (ERP), Bootstrap, SSIS, XML, LINQ, MuleSoft, TFS, LINQ to SQL, T-SQL, IIS 7.0

.Net Developer
DXC Technologies

March 2021 to October 2023
Bangalore,India

Roles & Responsibilities:

- Used MVC architecture for client server interaction.
- Developed and consumed Web Services to extract information from the database and other services.
- Experience in developing ASP.net web form designing.
- Developed the application using C#, ASP.Net, MVC and JavaScript with SQL Server as the back end.
- Developed .Net classes for the Data Access layer using the Data Access Application Block.

- Worked on Agile Methodology to achieve smooth collaboration between self-organizing, cross functional teams.
- Developed tables, stored procedures, views, functions and triggers to perform automated rules, updating to related tables in SQL server 2022/2019.
- Developed user client-side logics using JavaScript.
- Implemented .Net classes for Business Logic Layer using C#.
- Implemented form based authentication and maintained Session State information throughout the web transaction.
- Used and Designed WCF Services using SOAP protocols using C# while implement business logic middleware.
- Involved in performance tuning to optimize SQL queries using query analyzer.
- Implemented Client and server-side validations using JavaScript and ASP.NET validation controls.
- Configured the Web Config file for Session Management and trace.
- Designed CSS aiming for a rich personalization of server side controls.
- Provided database connectivity using ADO.Net and created procedures, Indexes and Triggers using MS SQL Server.
- Used Data Adapters and Datasets of ADO.Net to manipulate data in the SQL server database.
- Extensively used Data grids and Data lists to display item history and other information on the web pages. ed functional testing on various developed modules.
- Involved in generating and exporting SSRS reports.
- Used VSS for the source & document version control.
- Involved in developing Crystal Reports.

Environment: Microsoft Visual Studio .Net 2019/2015, ASP.NET Core 2.0, .NET 4.5, VB.NET, Angular, MVC, Bootstrap, API, C#.NET, SQL SERVER 2014, ASP.Net, JavaScript, MVVM, PowerShell, WPF, WCF, XAML, MVC5, AJAX, ADO.Net, HTML5, XML, XSLT, IIS 6.0, web services, Web API.
