

SRIRAMPRASAD BHUPATHI

Software Developer

Location: CA | Phone: (424) 260-4078 | E-mail: sriramprasadbhupathi@yahoo.com

PROFESSIONAL SUMMARY

- Seasoned Software Developer with having around 3 years of hands-on experience in software development.
- Proficient in a variety of programming languages including Java, C/C++, and SQL, with a deep understanding of their application in developing robust software solutions.
- Skilled in a wide range of web technologies such as HTML, CSS, JavaScript, AJAX, JSON, XML, JQuery, RestAPI, Typescript, and JPA, enabling the creation of dynamic and interactive web applications.
- Experienced in utilizing frameworks and libraries such as React, Spring Boot, Hibernate, Spring MVC, Node JS, Express JS, Angular JS, and Redux to build scalable and efficient web applications.
- Well-versed in database management with expertise in MS SQL, DynamoDB, MongoDB, and MySQL, ensuring efficient data storage, retrieval, and manipulation in software applications.
- Familiar with Agile (Scrum), Waterfall, and SDLC methodologies, adept at adapting to various project management approaches to deliver high-quality software solutions.
- Proficient in using a wide array of development tools including Git, VS Code, Visual Studio, PyCharm, IntelliJ, Eclipse, Jira, and Postman for efficient development, collaboration, and testing.
- Knowledgeable in cloud technologies including AWS (EC2, S3, Lambda, RDS, DynamoDB, and CloudWatch) leveraging cloud services to deploy, manage, and scale software applications.
- Demonstrated ability to deliver projects on time and exceed client expectations, with a strong focus on problem-solving and attention to detail.

TECHNICAL SKILLS

Programming Languages:	Java, C/C++, SQL
Web Technologies:	HTML, CSS, JavaScript, AJAX, JSON, XML, JQuery, RestAPI, Typescript, JPA
Frameworks & Libraries:	React, Spring Boot, Hibernate, Spring MVC, Node JS, Express JS, Angular JS, Redux
Database:	MS SQL, DynamoDB, MongoDB, MySQL
Methodologies:	Agile (Scrum), Waterfall, SDLC
Tools:	Git, VS Code, Visual Studio, PyCharm, IntelliJ, Eclipse, Jira, Postman
Cloud Technologies:	AWS (EC2, S3, Lambda, RDS, DynamoDB, CloudWatch)

EDUCATION

Master of Science, Computer Science California State University Long Beach – US	May 2023
Bachelor of Technology, Computer Science Karunya University - India	May 2020

CERTIFICATIONS

AWS Certified Developer Associate

PROFESSIONAL EXPERIENCE

Software Developer Epsilon,	Mar 2023 to Current CA
- Enhanced software performance and maintainability by expertly leveraging Java's object-oriented capabilities and libraries, resulting in more robust and scalable applications. - Optimized relational database management by utilizing SQL and MS SQL for data integrity and performance, streamlining data manipulation and enhancing efficiency. - Improved user interface responsiveness by implementing HTML, CSS, AJAX, and JSON, ensuring cross-browser compatibility and dynamic client-server interactions. - Elevated code quality and maintainability through the use of TypeScript and RestAPI, which facilitated a 50% improvement in data transfer efficiency and a 20% reduction in server load. - Accelerated development and deployment of web applications by leveraging powerful frameworks like Spring Boot and Spring MVC, combined with AngularJS, to enhance development speed and application scalability. - Streamlined database operations by utilizing Hibernate for ORM and DynamoDB for NoSQL requirements, achieving a 40% improvement in data access speed and a 25% decrease in maintenance efforts. - Enhanced project delivery and success by adhering to SDLC methodologies, resulting in a 15% quicker delivery time and a 20% increase in project success rates. - Facilitated team collaboration and code management by using Git for version control, improving branching and merging workflows and overall team efficiency. - Ensured robust application functionality through comprehensive API testing with Postman, automating tests to maintain high reliability and performance. - Enabled efficient, cost-effective serverless computing by implementing AWS Lambda, optimizing code execution and supporting an event-driven architecture. - Improved operational visibility and proactive issue resolution by configuring AWS CloudWatch for real-time monitoring of application and infrastructure performance. - Reduced infrastructure costs by 30% and enhanced scalability and reliability by 40% by effectively deploying and managing applications on the AWS cloud platform, utilizing services like EC2, S3, Lambda, RDS, and DynamoDB for optimal performance.	
Software Developer Beyond Key Solutions,	Jun 2019 to Jul 2021 India
Optimized database management by utilizing SQL for seamless data storage and retrieval across application modules, paired with strategic schema designs in MongoDB and MySQL to reduce storage costs by 20%.	

- Enhanced front-end designs by leveraging HTML, CSS, and JavaScript, which increased user engagement by 15% and reduced bounce rates by 25% through more interactive and visually appealing interfaces.
- Improved page performance by employing XML and jQuery techniques, resulting in a 40% reduction in load times and enhancing user interaction.
- Developed dynamic web interfaces using React, creating responsive and real-time user experiences that further streamlined interaction.
- Structured complex software applications using MVC architecture, Node.js, Express.js, and Redux, ensuring high scalability and maintainability.
- Enhanced project agility and efficiency by participating in Agile (Scrum) processes, including daily stand-ups, sprint planning, and retrospectives to swiftly adapt to changing project demands.
- Streamlined project management using Jira to meticulously create, track, and ensure timely completion of tasks, fostering robust team collaboration to achieve project milestones.
- Maintained code integrity and team collaboration by employing Git for version control, facilitating efficient code management across development phases.
- Ensured API reliability through extensive testing and debugging with Postman, verifying the functionality and stability of RESTful APIs integrated into applications.
- Optimized cloud resource management by integrating AWS RDS for scalable relational database management and AWS DynamoDB for flexible NoSQL data access, ensuring high availability and durability.
- Monitored and managed AWS resources effectively with AWS CloudWatch, optimizing performance and resource utilization to maintain system efficiency.
- Reduced cloud service expenses by 30% by leveraging AWS services strategically, which resulted in optimized cloud resource utilization and cost-efficiency.

ACADEMIC PROJECTS

- **Online Course Management System**

Technologies: Java, Spring Boot, Hibernate, MySQL, Thymeleaf, HTML, CSS, JavaScript, Bootstrap

- Backend Development: Developed RESTful APIs using Java and Spring Boot for course registration, user authentication, and schedule management, ensuring a robust and scalable backend architecture.
- User Interface: Created a responsive front-end with Thymeleaf, HTML, CSS, JavaScript, and Bootstrap, enhancing user experience and accessibility across devices.
- Database Management: Designed and optimized MySQL database schemas for efficient data storage and retrieval, improving data handling performance by 30%.

- **Hospital Management System**

Technologies: Java, Spring MVC, Hibernate, MySQL, JSP, Servlet, Apache Tomcat

- System Development: Implemented a comprehensive hospital management system using Java and Spring MVC, facilitating patient management, appointment scheduling, and billing operations.
- Database Integration: Managed MySQL database with Hibernate ORM for seamless data interaction, reducing query execution time by 40%.
- Security and Deployment: Deployed the system on Apache Tomcat and implemented role-based access control to secure sensitive patient information.

- **Library Management System**

Technologies: Java, Spring Boot, Hibernate, MySQL, Angular, RESTful APIs

- Backend and API Development: Developed RESTful APIs with Java and Spring Boot to handle book borrowing, returning, and inventory management, ensuring reliable backend operations.
- Frontend Development: Built an interactive and responsive interface using Angular, improving user experience for library staff and members.
- Database Management: Designed and maintained MySQL database schema for efficient data storage and retrieval, enhancing overall system performance by 25%.

- **E-Commerce Application**

Technologies: Java, Spring Boot, Hibernate, MySQL, React, AWS (EC2, S3)

- System Design and Development: Created a comprehensive e-commerce platform with Java, Spring Boot, and Hibernate, including features like product catalog, shopping cart, and order management.
- Frontend Implementation: Developed a dynamic user interface using React, providing a seamless and engaging shopping experience.
- Cloud Integration: Deployed the application on AWS EC2 and S3, ensuring high availability and scalability, and integrated secure payment gateways to handle transactions.
