Software Development Engineer with 2+ years of experience in software engineering, automated testing, and QA, with a strong foundation in both development and quality assurance across the full software lifecycle. Experienced in designing and executing automated and manual test strategies for complex web applications. Proficient in tools like Selenium and Playwright, and have developed backend testing tools in Python for functional and regression testing. Adept at working in Agile teams to ensure high-quality code delivery. Passionate about building reliable, scalable systems while embracing continuous learning and driving improvements through automation, cloud solutions, and cross-functional collaboration.

SKILLS

- Programming Languages: Python, C/C++, Java, JavaScript, VBScript
- Web Development: HTML, CSS, React, Django, Node.js, ASP.NET
- Database: SQL, NoSQL, MySQL, SQLite, MongoDB
- Data Analysis & Statistics: R, R Studio, Tableau, SPSS, MATLAB
- DevOps: Git, CI/CD pipelines, AWS CloudFormation, AWS CDK, Docker, AWS Lambda, Amazon CloudWatch, IAM
- Automation Testing: Selenium, Playwright
- Operating Systems: Linux/Bash
- Office Tools: Outlook, PowerPoint, Word, Excel (including advanced formula and VBA macro scripting)
- Languages: English (Fluent), Thai (Native)

EXPERIENCE

Software Engineer

Mar 2025 – Present

At Fidus Global - Backend Team

- Develop and maintain backend Warehouse Management Applications using C/C++, integrating with PLC-based automation systems to interface with industrial hardware, and manage databases with SQL.
- Contribute to the full software development lifecycle following Agile methodologies with Jira and Git for version control.
- Perform unit testing, debugging, and assist in the development of automated testing frameworks using Python.
- Collaborate closely with cross-functional teams, including UI developers, solution architects, and product managers, to gather requirements and deliver high-quality solutions.
- Delivered a critical warehouse system for a major US dollar store chain, optimizing inventory management and operations.

Skill Enhancement & Project Development

Jan 2024 - Present

- Continuously expanded technical expertise across diverse IT domains, e.g. AWS Cloud, Data Analytics, ML, and AI. Enhanced growth with industry certifications and achievements.

- 🔖 Microsoft Azure AI Fundamentals
- 🔖 Google AI Essentials
- 🔖 AWS Certified Cloud Practitioner
- 🔖 Google Cybersecurity
- 🔖 Google IT Automation with Python
- 🔖 Google Advanced Data Analytics
- 🔖 Google Project Management
- 🔖 Google Business Intelligence
- 🔖 Google UX Design

- Developed and implemented projects for showcased skills

- Full stack web application ( [Github](#))
 - Full stack web application development with Django, Python, HTML, CSS, and SQLite. Deployed the app on AWS EC2 for server management
 - Migrated to AWS Elastic Beanstalk with RDS for database management, enabling easier scaling and more efficient management of resources.
- Project: Machine Learning based optimization of matrix multiplication ( [Github](#))
 - Implemented three matrix multiplication methods: naive, block, and Strassen, and enabled parallelization to improve computational efficiency
 - Visualized initial performance comparisons between the methods in Jupyter Notebook
 - Implemented the Reinforcement Learning, PPO algorithm in PyTorch

Freelance Investor

Jan 2018 - May 2023

- Successfully managed a personal investment portfolio, allocating capital across stocks and cryptocurrencies
- Utilized a data-driven approach to assess market trends and make informed investment decisions, achieving an average return of 17% per year over a 5-year period, with a peak return of more than 140% in a single quarter.
- Developed and implemented a custom TradingView indicator using Pine Script to enhance market analysis and identify profitable trading opportunities.

Lab Research Placement (Internship)

Feb 2017 - Jul 2017

At University of Stirling, UK - Department of Psychology, Faces Research Laboratory

- Developed and implemented eye-tracking experiments using Tobii eye tracker and MATLAB to study cognitive processes in familiar face recognition, creating a prototype pilot for the research “A grey area: how does image hue affect unfamiliar face matching?” by Bobak et al. (2019) ( [Link](#)), published in *Cognitive Research: Principles and Implications* (contributions credited in the acknowledgements section of the publication).
- Analyzed and interpreted experimental data using SPSS, contributing to data-driven insights on face perception.
- Conducted human behavior and usability research and contributing to the design and analysis of cognitive tasks, credited in a peer-reviewed publication for supporting product-relevant user experience insights.

Senior Programmer Analyst

Jul 2015 - Jun 2016

At Advanced Info Service Public Co., Ltd, (Subsidiary MiMO Tech), Thailand - Software Quality & Tester Center

- Designed, developed, and deployed a fully automated testing infrastructure, leveraging HP UFT and CI/CD integration to ensure seamless, continuous validation of web applications.
- Ensured software quality and reliability before deployment to production, serving over 40 million subscribers.
- Created and maintained comprehensive test plans, collaborating with developer teams to define key scenarios and software specifications.
- Built and maintained a product wiki web application using MongoDB and Node.js, providing documentation to support ongoing development and ensure effective use of automated tests.
- Delivered projects efficiently by leveraging Agile Scrum methodologies for adaptability and continuous improvement.

Quality Assurance (Internship)

Jun 2013 - Aug 2013

At DST Worldwide Service Limited, Thailand - Trading solutions department

- Performed functional testing for equities and derivative warrant trading software
- Developed an automated composer for CMMI report using macro-VBA on MS Excel

EDUCATION

Vocational / AWS Cloud Training and Certification

2024 – Present

AWS Cloud Institute, Remote, United States

- Studying cloud computing fundamental, Python programming, and AWS practices with hands-on projects

Master of Science / Psychology

2017

University of Stirling, United Kingdom

- Dissertation: Self-awareness influencing human's emotion and their expression

Master of Science / Technopreneurship

2015

King Mongkut's University of Technology Thonburi, Thailand

- Independent Study: Online Marketing Strategy on Facebook for Retail Cosmetics Store

Bachelor of Engineering / Computer Engineering

2014

King Mongkut's University of Technology Thonburi, Thailand

- Project: The Emotion Detector (TED) - a machine learning-based app that predicts emotions through facial image and speech signal processing for telemedicine in mental healthcare on web and mobile application

Achievements gained

- TED Project : finalist of Microsoft Imagine Cup 2014, National Software Contest, and Thailand ICT Award
- First Class Honors

PUBLICATION

Tivatansakul, S., G. Chalumporn, S. Puangpontip, **Y. Kankanokkul**, T. Achalaku and M. Ohkura, 2014. Healthcare system focusing on emotional aspects using augmented reality: Emotion detection by facial expression. *Advances in Human Aspects of Healthcare*, 3, 375. ([🔗 Link](#))
