Seattle, WA | [yalemsewlashitaw@gmail.com](mailto:yalemsewlashitaw@gmail.com) | 425 591 1531 | [www.linkedin.com/in/mekuriaw/](https://www.linkedin.com/in/mekuriaw/)

## Full-Stack Software Engineer

Full-Stack Software Engineer with 5 years of experience in end-to-end software development across fintech, education, and HR domains. Proficient in RESTful API services, modern UI frameworks, microservices, cloud computing, CI/CD and Docker. I have Strong competency in problem-solving, algorithms, data structure, and system design. Currently seeking an opportunity that values teamwork, innovation, and professional growth.

## EXPERIENCE

---

**CAREER NOTE:** Completed on-campus studies and currently taking distance education courses to complete a **Master's Degree in**

**Computer Science** (Available for full-time, Work Authorization: **GC EAD**)

---

**10/2023 – Present**

**Jimma University ICT Development, Jimma, Ethiopia**

**09/2020 - 06/2023**

### Senior Software Engineer

- Migrated monolithic application to Spring Boot microservices, improving scalability and enhancing system resilience.
  - Redesigned UI logging with caching and batching, reducing UI and backend overhead from excessive API calls.
  - Optimized query performance by using indexing and caching, ensuring seamless support for 100k+ users and a million daily transactions.
  - Employed CI/CD pipelines for automated deployment and maintenance, streamlining development workflows and enhancing application reliability.
  - Wrote batch jobs using bash scripts to automatically execute tasks based on schedules, reduces manual work by up to 70%.
  - Integrated backend-for-frontend (BFF) architecture to transform and offload data processing, resulting in faster load times, and an enhanced user experience.
  - Mentored junior developers and interns to accelerate their onboarding, helping them contribute to production code within 2 weeks.
  - Optimized UIs performance with lazy loading, code splitting, and API pagination, eliminated delays and speed up data loading for near-instant user interactions.
- 

**Geez Software Technology, Addis Ababa, Ethiopia**

**06/2018 - 09/2020**

### Junior Software Engineer

- Developed a reusable Angular components and custom directives library, reducing development time and ensuring design consistency across the application.
- Integrated external financial APIs (Alpha Vantage) into the fintech app using Spring Boot and React.js.
- Utilized Spring technologies, Hibernate and Spring Data JPA, to implement the Data Access Layer (DAO) for efficient database interaction.

- Conduct comprehensive unit, integration, and smoke testing using JUnit, Mockito, and Selenium to ensure code quality and functionality.
- Implemented authentication and authorization mechanisms using JWT and OAuth2.
- Engaged in peer-to-peer code reviews, providing constructive feedback, and addressing local bug fixes to resolve issues early in the development phase.
- Improved accessibility scores by 40% and increased user engagement through WCAG 2.1-compliant design.

## SKILLS

---

**Programming Languages:** JavaScript, Java, TypeScript, Python

**Web:** HTML5, CSS, Bootstrap, Node.js, React.js

**Web Services:** REST, SOAP, JSON, XML, GraphQL, WebSocket, Ajax

**Frameworks:** Spring Boot, Spring Cloud, Angular

**SDLC:** Agile, Waterfall, Scrum, Test driven Development (TDD)

**Databases:** SQL, NoSQL, MySQL, PostgreSQL, MongoDB, Redis, Cassandra, Oracle

**Cloud & DevOps:** AWS (EC2, S3, ECS, EKS, Lambda, CloudWatch), SaaS, Azure

**Design Patterns:** MVC, SOA, Proxy, Builder, Dependency Injection

**Tools & platforms:** Apache Kafka, Jenkins, Kubernetes, Jira, Git/GitHub, GitLab, Bitbucket, Maven, Unix, Linux, Windows, Jest

## EDUCATION

---

### **Maharishi International University**

*Master of Science in Computer Science*

*(In progress via distance education)*

**Relevant Coursework:** Modern Web Application, Software Architecture, Advanced Software Design, Big Data

*Fairfield, Iowa, USA*

### **Siksha 'O' Anusandhan University**

*Bachelor of Technology in Electrical and Computer Engineering*

**Relevant Coursework:** Computer Architecture, Machine Learning, Cloud Technologies (GCP), Algorithm and Data Structure

*Bhubaneswar, Odisha, India*
