
Summary

Data and Application Architects currently working at the Public Protection Cabinet, applying advanced analytics to real-world datasets. Skilled in Python, SQL, Tableau, and Power BI with hands-on expertise in data cleaning, reporting, and statistical modelling. Experienced in delivering actionable business insights, automating workflows, and supporting decision making through data visualization and predictive analysis.

Skills

- **Programming:** Python, R, C, C#, SQL
 - **Data Visualization:** Tableau, Power BI, Matplotlib, Seaborn
 - **Machine Learning & AI:** scikit-learn, XGBoost, TensorFlow, PyTorch
 - **Data Handling:** Pandas, NumPy, Data Preprocessing, EDA
 - **Web Development:** HTML5, CSS, JavaScript, Angular, Typescript, ASP.NET.
-

Education

University of Texas at Arlington (UTA), Texas, USA

Jan 2024 – Dec 2025

M.S. in Applied Statistics and Data Science, GPA: 3.88

Coursework: Python for Data Science, Machine Learning, Deep Learning, Distributed & Scalable Systems

Usha Rama College of Engineering and Technology, AP, India

Jan 2018 – Dec 2022

B.E. in Electronics and Communication Engineering

Experience

Public Protection Cabinet – Data Analyst Intern

United States | Aug 2025 – Present

- Conducting statistical analysis and data visualization to support decision-making.
- Writing SQL queries for data extraction, cleaning, and transformation across multiple sources.
- Automating reporting dashboards in Tableau and Power BI, improving efficiency by 25%.
- Collaborating with senior analysts to identify trends and prepare compliance reports.

Oeson Learning – Data Scientist Intern

United States | May 2024 – Aug 2024

- Trained in Python, Statistics, SQL, and Tableau to clean, process, and visualize data for business decision-making.
- Completed projects analysing customer behaviour, product performance, and market trends, delivering actionable insights.
- Gained a foundational understanding of the data analyst role, bridging technical skills with business and economics.
- Applied a multi-disciplinary perspective to approach analytics creatively.

Capgemini – Data Analyst

India | Oct 2022 – Jan 2024

- Designed and maintained SQL queries to extract, transform, and validate large datasets for reporting.
 - Built automated Python scripts to streamline data pipelines, reducing reporting time by 75%.
 - Developed dashboards in Power BI and Tableau to present KPIs and trends to stakeholders.
 - Collaborated with cross-functional teams to analyse customer data, identify patterns, and deliver business insights.
 - Implemented validation mechanisms and automation processes that reduced system errors by 90%.
-

Projects

Credit Card Fraud transaction analysis project

University of Texas at Arlington | Jan 2024 – April 2024

- Used Python and Pandas to clean and preprocess millions of transaction records, transforming raw data into structured formats for further analysis and improving data processing efficiency by 30%.
- Applied machine learning algorithms with Scikit-learn and XGBoost to build predictive models that identified fraudulent transactions with 85% accuracy, optimizing fraud detection rates.

Singapore Demographic Analysis

University of Texas at Arlington | Sep 2024 – Dec 2024

- Applied hypothesis testing and time series analysis for sociocultural insights. Created demographic visualizations highlighting multi-ethnic population trends.

Hotel Booking Cancellation Analysis

University of Texas at Arlington | Jan 2025 – May 2025

- Performed EDA and time series modelling to predict booking cancellations. Improved cancellation prediction accuracy by 20% using Python & Seaborn.
- Technologies used: Python, Time Series Analysis, Data Preparation, Exploratory Data Analysis, and Data Visualization.
