EDUCATION

Stevens Institute Of Technology

Masters in Software Engineering GPA: 3.96/4.0

Jersey City, NJ

Aug. 2023 – May 2025

EXPERIENCE

Software Developer

Jan 2023 – July 2023

Dash Ninja Technologies

Hyderabad, India

- Developed and enhanced healthcare workflow applications using C#, ASP.NET, SQL improving efficiency by 25%
- Diagnosed and resolved over 80% of customer-reported real-time issues on the AngularJS platform, improving application stability and user satisfaction
- Streamlined frontend workflows, optimizing system responsiveness and achieving a 25% improvement in user experience.
- Conducted root cause analysis and implemented lasting fixes, reducing recurring issues by 30% . Participated in Agile sprint planning, standups, and retrospectives; collaborated cross-functionally to deliver features with QA readiness for production.

Associate Software Engineer Intern

Mar 2022 – Jun 2022

LTI-Mindtree

Hyderabad, India

- Architected secure online banking application modules using Java and SQL Server, integrating RESTful APIs for real-time transaction monitoring; flagging 98% of fraudulent activities within milliseconds.
- Improved security by performing vulnerability assessments and applying security patches, reducing breach incidents by 40%.
- Conducted 10+ code reviews weekly, enforcing clean coding standards and reducing defects by 30%
- Utilized Git for version control and built CI/CD pipelines using Jenkins and Maven, integrating with Bitbucket; developed and executed API test cases with Postman and JUnit, tracked defects using JIRA, supported UAT, and contributed to full SDLC phases, resulting in a 40% increase in test coverage and 99% defect-free releases.

Associate Software Engineer Intern

Jul 2020 – Sep 2020

Verzeo EduTech

Hyderabad, India

- Developed efficient data preprocessing pipelines using Python and SQL, reducing manual intervention by 35% and improving AI model accuracy by 18%.
- Engineered structured data workflows and automated model evaluation using Pandas, C#, and .NET, reducing manual data processing time by 35% and improving model validation speed by 30%.

PROJECTS

Expense Tracker Application | *React, Node.js, Express.js, MongoDB, Bootstrap, Chart.js.* | Sep 2024 – Dec2024

- Built a user-friendly personal finance application using React and Bootstrap to enable users to track income, expenses, and budgets with responsive UI components.
- Implemented customizable budgeting tools using Express.js and MongoDB, allowing users to set, adjust, and monitor financial goals in real time.
- Conceptualized interactive dashboards leveraging Chart.js, displaying real-time spending against budget and forecasting potential overspending with 95% accuracy.

Virtual Try-On Room | *Python, Flask, OpenCV, MySQL* |

Sep 2021-Jan2022

- Developed an immersive Virtual Try-On Room using Python and Flask, enabling users to simulate trying on clothing in a digital environment.
- Applied advanced image processing techniques with OpenCV to improve virtual clothing fitting accuracy by 25%.
- Engineered interactive clothing customization interface utilizing MySQL database integration, enabling real-time personalization of apparel and accessory choices for over 1,000 daily active users.

TECHNICAL SKILLS

Languages: Python, Java, C#, HTML/CSS, JavaScript, SQL, MySQL, Node.js, MongoDB

Software Development: Object Oriented Programming, Data Structures, Algorithms, RESTful API.

Frameworks: Flask, Django, React, Angular, Express JS, ASP.NET, REST APIs

Developer Tools: Git, Bash, Jenkins, Terraform, CI/CD Pipelines, Jenkins, Maven, Bitbucket, Cucumber, JUnit
