

Yash Jitendra Pol

18 Wright Avenue, Jersey City, New Jersey, 07306 | (201)-423-8093 | yp03555n@pace.edu |

PROFILE

A Computer Science graduate student at Pace University with strong backend development expertise in Core Java, Spring Framework, Spring Boot, and RESTful services. Hands-on experience in building scalable e-commerce platforms, integrating secure payment gateways, managing cloud-based databases (AWS RDS, MySQL), and implementing inventory modules. Adept in using Oracle, Tomcat, and ReactJS for full-stack web development. Passionate about developing enterprise-grade applications using cloud and Java-based technology stacks.

EDUCATION

M.S IN COMPUTER SCIENCE | PACE UNIVERSITY, NEW YORK
B.E IN COMPUTER ENGINEERING | A.P.SHAH COLLEGE, MUMBAI, INDIA

EXPECTED MAY 2025
AUGUST 2019-MAY 2023

CERTIFICATES

- “**Data Analysis with Python**” a course on coursera powered by IBM
- Preparing for **Oracle Certified Associate (OCA) Java SE 8** Programmer certification
- Courses on **coursera** for **python related tools and applications** and gained the certificate for building the project.
- Courses on **APSIT Skills regarding Machine learning and AI applications** and aquired certificate for building projects like movie recommendation, **basic GNN Applicaitons**.

WORK EXPERIENCE

SoleFry E-Commerce Platform – Java Developer

June 2020 – August 2022

- Collaborated in the end-to-end design and development of a large-scale e-commerce platform for women's footwear, facilitating online shopping, secure transactions, and inventory management.
- Designed and implemented **RESTful APIs** using Spring Boot to support seamless frontend-backend communication, with frontend built using ReactJS.
- Integrated payment gateway services for Credit/Debit card and Net Banking support with Merchant ID configuration for secure, authenticated transactions.
- Developed core inventory and order management modules, enabling real-time product updates and tracking via **Oracle** and **MySQL** databases.
- Implemented user authentication and profile modules, including add/edit/delete of shipping addresses and account details.
- Configured **AWS S3** for static content storage and **AWS RDS** for persistent relational data, ensuring system scalability and high availability.
- Led migration of local deployments to **Apache Tomcat 8** in cloud environments, optimizing load handling and deployment pipelines.
- Contributed to performance tuning, bug fixes, and feature enhancements based on evolving business requirements and customer feedback.

SKILLS & ABILITIES

Programming and Frameworks: Core Java, Python, SQL
Frameworks: Spring, Spring Boot, ReactJS
Database and Storage : Oracle, MySQL, AWS RDS, DynamoDB
Cloud And Orchestration: AWS (EC2, S3, RDS)
Web and Server Tools: Tomcat 8, REST APIs

PROJECTS

Cloud based Chatbot for Admission Enquiry Class Project

Jan 2020 – May 2022

- Designed and deployed a cloud-based chatbot using **Google Dialogflow**, leveraging **Natural Language Processing (NLP)** to enable intelligent query handling and automated responses.
- Integrated customized **Q&A** features and deployed the chatbot on a website, ensuring seamless multi-platform accessibility while utilizing Dialogflow's intent recognition and entity extraction to enhance user interaction across apps, bots, and voice systems

Fake Reviews Detection for E-commerce Applications using Machine Learning Algorithms.

July 2022 – May 2023

- Developed an **AI-driven** fake review detection system for e-commerce platforms, utilizing **N-grams** and **sentiment analysis** to extract key linguistic patterns from a Kaggle dataset, applying data preprocessing techniques to enhance model accuracy.
- Implemented **Naïve Bayes**, **Support Vector Machine (SVM)**, and **Logistic Regression**, where SVM constructs an optimal hyperplane for classification, Naïve Bayes computes probabilistic review authenticity, and Logistic Regression maps feature vectors to predict fake or genuine reviews with high precision
