PROFESSIONAL EXPERIENCE

Data Analyst Intern, Sedin Technologies Inc, Sunnyvale, USA

May 2024– Jul 2024

- Automated sales forecast dealer business report in Tableau, improving financial planning and budgeting accuracy by 30%.
- Designed ETL (Extract, Transform, Load) scripts to process data from CSV to Azure Synapse for 130+ tables every 15 minutes.
- Created and optimized complex stored procedures, functions, tables, triggers, synonyms for data handling and business operation.
- Ingested data from varied tables, executed SQL queries to validate vendor list and successfully reduced data duplicity by 80%.
- Leveraged Python for seamless integration of sales data to existing databases for robust data analysis of third-party vendors.

DataScience and Engineering Intern, BlueStar India Limited, India

Nov 2022– May 2023

- Standardized text data using Python regex, improving data integrity & processing throughput, achieving 90% data accuracy.
- Conducted geospatial analysis using ArcGIS for mapping nearest customer segmentation and reducing service time by 10 hours.
- Leveraged OpenCV with OCR to extract specifications from invoice; improving product documentation and data management.
- Employed advanced data cleaning & preprocessing tasks with SpaCy and the Levenshtein library to refine text address data.
- Collaborated with Engineering to create a Tableau dashboard for streamlined customer segmentation and business insights.

Data Analytics Engineer, Mitibase Technologies Private Limited, India

Feb 2021 – Oct 2022

- Engineered a graph database using Neo4j enabling data visualization of interconnections and locating cross-sell opportunities.
- Improved database performance by implementing indexing strategies and optimizing queries, reducing response times by 25%.
- Implemented the integration of CI/CD pipelines using Jenkins and Git for existing standalone and web applications efficiently.
- Collaborated with IT, Ops team to enhance process documentation of migrating data pipelines and reduced processing time.
- Developed a web scraping tool in Python to capture insurance data ratings; Automated 15K records; reduced time frame by 85%.

Product Data Analyst, Bajaj Allianz General Insurance Company Limited, India

Aug 2019 – Jan 2021

- Devised Tableau Product Scorecard for KPI tracking, automating monthly reconciliation; reduced weekly workload by 15 hrs.
- Executed competitive data analysis using advanced Excel functions: VLOOKUP, Regex & Pivot tables to get valuable insights.
- Engineered Qlik Sense dashboards on agent performance, ensuring regulatory audits compliance reporting needs were met.
- Performed competition benchmarking of financial statements and products across insurers, advancing product development.
- Conducted market and competitor research for bite-sized insurance; identified customer segments and distribution channel.
- Collaborated with marketing and underwriting teams to design product growth plans by refining rate & coverage strategies.
- Managed the product life cycle by coordinating, conducting UAT with IT ensuring enhancements for agent reporting system.

ACADEMIC PROJECTS

Bank Loan Analysis *Tableau, Microsoft SQL Server, Microsoft Excel*

- Cleaned and preprocessed data in MS SQL Server to ensure quality and consistency, leading to accurate actionable insights.
- Developed an interactive Tableau dashboard with calculated fields & slicers to monitor KPIs and facilitate data exploration.

Credit Card Fraud Detection *Tableau, Microsoft SQL Server, Microsoft Excel*

- Performed data cleaning, data preprocessing and exploratory data analysis on a 600k-record dataset to ensure data quality.
- Utilized Logistic Regression, Decision Tree Classifier and Gaussian Naive Bayes. Achieved 99.98% accuracy in Random Forest.

EDUCATION

University of Texas at Dallas, USA, Master of Science in Business Analytics and AI

Aug 2023 – May 2025

Coursework: Database Management, Spreadsheet Modelling, Machine Learning, Big Data, Data Modeling, Data Warehousing

IIIT Bangalore, Bengaluru, India, Post Graduate Diploma in Data Science

May 2022 – Aug 2023

Coursework: Data Visualization, ETL Pipelines, Statistical Analysis, Data Pulling, Data Processing, Python Scripting, Modeling

TECHNICAL SKILLS

Programming Languages– Python (Pandas, NumPy, Scikit-learn, OpenCV, Matplotlib, Seaborn), R, SQL, SAS, BigQuery, MATLAB

Databases and Cloud– SQL Server, PostgreSQL, MySQL, SSIS, PySpark, Talend, SSMS, AWS S3, Redshift, Oracle, NoSQL, Quicksight

BI and Marketing– Tableau, Power BI, Looker, Domo, Qlik Sense, Excel, Google Analytics, MS-Access, Adobe Analytics, ArcGIS, Neo4j

Project and Workflow Management– Salesforce, Asana, Jira, Confluence, Tableau Prep, Alteryx, Airflow
