

YASH ZAVERI

(857)395-8903 | Boston, MA | zaveri.y@northeastern.edu | [linkedin.com](https://www.linkedin.com) | github.com

EDUCATION:

Master of Science in Computer Software Engineering

Northeastern University, Boston, MA

Sep 2023 - Present

GPA : 3.7/ 4.0

Relevant Course: Cloud Computing and networking, Advance Big Data, Data Structure, Object-Oriented Design, Design Pattern

SKILLS:

Language: Java, J2EE, Node.js, JavaScript, Python

Databases: MySQL, PostgreSQL, MongoDB, NoSQL, DynamoDB, RDS, Microsoft Azure

Platform: Amazon Web Services (AWS), Docker, Jenkins, Kubernetes, Terraform, Git, CI/CD Pipelines, Render

Framework: Spring Boot, RESTful APIs, Hibernate, React.js, Angular, RabbitMQ, JUnit, Maven

PROFESSIONAL EXPERIENCE:

Graduate Teaching Assistant

Northeastern University

May 2025 – Present

Boston, MA

- Assisted the Professor in **delivering engaging lectures and hands-on lab sessions** for the CSYE7374: Design Patterns course, **delivering personalized guidance to over 50 students on Java, Design Patterns and OOP Principles**, leading to a **60% improvement** in class performance
- Designed hands-on coding exercises, real-world projects, and graded assignments using GitHub Classroom repositories, **providing comprehensive support** in project development, debugging, and understanding requirements

Software Engineering Intern

Healthful Telehealth Inc.

Jan 2025 – May 2025

Boston, MA

- Developing an **AI Copilot for Registered Dietitians**, integrating **OpenAI API , RAG, and Langchain** for intelligent meal planning and patient-specific recommendations, after in-depth research and evaluating cost-effective solutions
- Designed a **chat-based system** using **React, Node.js, and MongoDB**, enabling secure patient data input, file uploads, and AI-powered insights while ensuring **HIPAA compliance criteria**
- Enhanced RAG-based **system accuracy by 30%** through **LangChain**, efficient API integration, and database indexing, and **deployed** the application using **GitHub Actions** and **Render** for streamlined production hosting

Java Developer

AxisRay

Feb 2023 - Jun 2023

Gujarat, IN

- Developed **Voice Intelligence Project based on Alexa** collaboratively with team, utilizing **MySQL, Amazon Web Services (Lambda, RDS), Alexa Services, and J2EE technologies (Spring, Spring-Boot)**
- Orchestrated the development of a **dynamic learning system with interactive verbal interactions**, enhancing user engagement by 40% and reducing application downtime by 50% through proactive maintenance strategy
- Led seamless cross-functional collaboration with the team, **optimizing AWS resources** for 40% improved system scalability and performance

Full Stack Developer

Softvan Pvt. Ltd.

Jun 2021 - May 2022

Gujarat, IN

- Led the development of a **dynamic web application**, using **Java, Spring Boot, Hibernate, and RabbitMQ** for backend, while implementing **responsive front-end interfaces** with HTML5, CSS, and JavaScript for an intuitive user experience
- Supported **Agile development**, clarifying project scope with diagrams, fostering collaboration, and achieving **20% efficiency boost**, ensuring seamless **frontend-backend communication** with RESTful APIs, **RabbitMQ**, and AJAX
- Attained **30% bug reduction** through **Java code optimization**, coordinated app updates, and optimized **database schemas** for efficient data storage and retrieval

PROJECTS:

Inventory Management System | (Northeastern University)

Jan 2025 – Apr 2025

- Designed and developed a full-stack Inventory Management System using **Java EE, Spring Framework, React, and MySQL**, integrating **Hibernate** for seamless database interactions and delivering a responsive, user-friendly interface
- Applied **design patterns (Singleton, Abstract Factory, Observer, Strategy, Decorator)** to ensure scalability and maintainability, while automating inventory alerts and optimizing purchase order workflows for improved system efficiency

Cloud-Native Web Application with AWS Infra Automation | (Northeastern University)

Sept 2024 – Dec 2024

- Built a cloud-native web application using Node.js and MySQL, integrating RESTful APIs for secure user authentication, data handling, and a health check endpoint to monitor service and database status
- Automated AWS infrastructure deployment with Terraform and Packer, provisioning EC2, S3, RDS, and custom AMIs with KMS encryption and Secrets Manager integration; improved CI/CD efficiency by 50% via GitHub Actions and resolved SSH configuration issues on AWS VMs through IAM-based access and environment variable encryption

Financial Transaction Processing System | (Northeastern University)

Jan 2024 - May 2024

- Developed a **Java-based microservices system** for **real-time transaction processing** and Integrated **Kafka messaging** for reliable and efficient data streaming across financial modules
- Deployed using **Docker, Kubernetes, and Jenkins for CI/CD**, ensuring high availability and security and Implemented **RESTful APIs** to facilitate seamless **banking and payment gateway integrations**
