

YASWANT RAVI

DATA ANALYST

AZ, USA | (732) 994-6057 | ryaswant18@gmail.com | [LinkedIn](#)

SUMMARY

- Insight-driven Data Analyst with **4+ years** of experience delivering **end-to-end data solutions** across healthcare and finance sectors, with proven success in optimizing patient outcomes and minimizing portfolio risk through evidence-based analytics.
- Built scalable data pipelines and governed ingestion frameworks using **Azure Data Factory** and **Snowflake** at **Optum**, enabling clinical teams to access real-time population health insights, and reducing latency in **EHR** data exchange.
- Designed credit risk assessment models for **JPMorgan Chase** using **R** and **BigQuery** at **Cognizant**, enhancing exposure analysis, **PD/LGD** scoring, and ensuring full compliance with evolving **Basel III** reporting mandates.
- Leveraged visualization tools such as **Tableau** and **Power BI** to transform fragmented datasets into strategic executive dashboards, facilitating informed decision-making through intuitive **KPI** storytelling and interactive segmentation.
- Acted as a liaison between data teams, product stakeholders, and compliance leads, translating regulatory requirements into secure, audit-ready analytic workflows aligned with **HIPAA**, **GDPR**, and **SOX** governance protocols.

SKILLS

Programming & Query Languages:	Python (Pandas, NumPy, Seaborn, Matplotlib), R, SQL, SAS
Databases & Warehousing:	PostgreSQL, MongoDB, Cassandra, Amazon Redshift, Snowflake, Google BigQuery
Data Visualization & Reporting:	Tableau, Power BI, Excel (Advanced, VBA), Crystal Reports, SSRS
ETL & Data Integration Tools:	Talend, Informatica, SSIS, Apache Airflow
Machine Learning & Analytics:	Scikit-learn, SPSS, TensorFlow, Clustering, Regression, A/B Testing, Forecasting
Cloud & Version Control:	AWS, Azure, Git, GitHub
Data Quality & Compliance:	Talend Data Quality, Alation, Data Encryption, Masking, GDPR, HIPAA
Domain Knowledge:	ICD-10, CPT, HL7, Data Governance, Root Cause Analysis, Ad Hoc Analysis, Data Storytelling
Certification	Microsoft Certified: Power BI Data Analyst Associate

WORK EXPERIENCE

Optum, AZ, USA | Data Analyst Nov 2023 – Current

- Developed robust ingestion frameworks using **Azure Data Factory** and configured workflows to channel structured/unstructured clinical data into **Snowflake**, reducing ingestion latency by 28% while enhancing accessibility for care managers across 15 healthcare regions.
- Applied **Pandas** and **NumPy** for transforming and cleaning **HL7**-coded patient records, engineering reusable functions to map **ICD-10** and **CPT** codes with precision, improving diagnosis classification accuracy by 21% for downstream stratification.
- Implemented classification algorithms using **Scikit-learn** to predict chronic illness progression based on clinical attributes and socio-demographic features, supporting early care interventions, and reducing hospitalization rates among at-risk patients.
- Designed clinical KPI dashboards in **Tableau** by integrating **FHIR** streams and **CAHPS/HEDIS** data, empowering population health teams to evaluate care performance trends and act on quality gaps in real-time.
- Used **Talend Data Quality** to enforce data profiling, null-check validation, and integrity rules across **EHR** and claims datasets, applying **masking** and **encryption** to support **HIPAA**-compliant analytics environments.
- Scheduled high-dependency ETL jobs via **Apache Airflow**, orchestrating claims, medications, and lab ingestion pipelines while reducing manual execution time by 34% and improving SLA adherence metrics by 19%.
- Engaged with interdisciplinary teams including clinical SMEs, legal advisors, and BI teams, conducting impact assessments, refining reporting logic, and embedding actionable insights into care coordination strategies.

Cognizant, India | Data Analyst Jan 2020 – Jul 2022

- Engineered modular ETL pipelines using **Informatica**, extracting raw loan, credit, and bureau data from multiple sources, performing transformation logic for schema harmonization, and integrating outputs into risk modeling environments.
- Modeled Probability of Default (PD) and Loss Given Default (LGD) using **Python**, applying logistic regression, historical delinquency segmentation, and macroeconomic variable inclusion to meet **Basel III** stress testing protocols.
- Created executive dashboards in **Power BI** to visualize risk exposure across product lines, designing dynamic filters and drill-throughs that enabled senior management to identify and mitigate portfolio-level vulnerabilities; boosted dashboard interaction by 35%.
- Built delinquency forecasting pipelines using **SAS**, incorporating customer behavioral flags, time-series techniques, and scorecard thresholds to refine reserve allocation strategies and monitor potential early defaults.
- Leveraged **Google BigQuery** to construct optimized materialized views and federated joins across multi-terabyte credit datasets, drastically improving query run time and enabling **ad hoc** risk scenario simulations.
- Employed **Matplotlib** and **Seaborn** to monitor model stability and generate feature correlation matrices, facilitating robust validation processes and reducing model drift incidents by 22% over quarterly reviews.
- Designed custom **SQL**-based fraud logic incorporating transaction anomalies, geo-risk mapping, and merchant classification patterns, reducing false positives by 26% and boosting detection precision within the credit risk scoring engine.
- Participated in **Agile**-based sprints with compliance and audit teams, translating business risk requirements into analytic artifacts, while leading documentation of metric definitions and **root cause analysis** for reporting discrepancies.
- Collaborated closely with product owners, risk analysts, and QA engineers in **Agile** sprint cycles, facilitating backlog grooming, clarifying analytical requirements, and fostering open communication to ensure on-time delivery of data-driven solutions.

EDUCATION

- Master of Science in Data Science and Analytics** - New England College, Henniker, NH, USA
- Bachelor of Technology in Mechanical Engineering** - GMR Institute of Technology, Srikakulam, India
