

Professional Summary

- Over **5 years of experience** as a **Business Intelligence (BI) Developer**, specializing in designing and delivering end-to-end BI solutions for enterprise environments.
- Proven ability to create advanced **data models**, design **interactive dashboards**, and develop **analytics solutions** that empower stakeholders to make data-driven decisions.
- Expertise in **data extraction, transformation, and loading (ETL)** processes using tools like **SSIS, Informatica**, and **Azure Data Factory**, ensuring seamless data integration.
- Skilled in optimizing the performance of **Power BI dashboards** and **SQL queries**, including the implementation of **row-level security (RLS)** to enhance user experience and security.
- Adept at collaborating with **cross-functional teams**, including Product Management, Finance, and IT, to understand complex business requirements and deliver actionable insights.
- Hands-on experience with **Qlik Sense (transferable skills)** and **Snowflake data warehousing**, designing scalable solutions aligned with best practices for analytics development.
- Demonstrated ability to lead **BI development teams**, mentoring junior developers and fostering a collaborative, results-driven environment.
- Automated reporting workflows using **PowerShell scripting**, saving over **50 hours of manual effort per month**.
- Strong expertise in **data governance, compliance practices**, and **SDLC best practices**, ensuring secure and regulatory-compliant BI solutions.
- Passionate about leveraging **real-time data analytics**, performance optimization, and innovation to drive business transformation.

Technical Skills

- **BI Platforms:** Power BI, Tableau, Qlik Sense (transferable experience), SSRS, QlikView
- **Data Integration:** Azure Data Factory, SSIS, Informatica
- **Databases:** SQL Server, Snowflake, Oracle, MySQL, PostgreSQL
- **Programming/Scripting:** DAX, SQL, Python, PowerShell, Shell Scripting
- **Data Modeling:** Dimensional Modeling, Star Schema, Snowflake Schema
- **Cloud Platforms:** Azure Data Lake, AWS Redshift, Google Big Query
- **Other Tools:** Excel (Power Query, VBA), Alteryx, Jupyter Notebook, Git
- **Best Practices:** SDLC, Data Governance, Security, Compliance Practices

Professional Experience

Senior BI Developer CDW

09/2024 to Current

- Led a team of BI developers in designing and implementing **end-to-end Power BI solutions**, improving reporting efficiency by 30%.
- Developed **complex DAX formulas and SQL queries** to create dynamic dashboards and reports, enabling real-time KPI monitoring.
- Optimized BI platform performance by implementing **row-level security (RLS)** and tuning techniques, reducing query execution time by 25%.
- Collaborated with stakeholders **across Product Management, Data Platforms, and Finance teams** to gather requirements and deliver customized analytics solutions.
- Automated recurring reports and workflows using **PowerShell scripting**, saving over **50 hours of manual effort monthly**.
- Provided **technical guidance and training** to junior developers, fostering a self-service analytics environment.
- Ensured compliance with **data governance and security standards**, enhancing the stability and integrity of BI solutions.

Trigent Software

- Developed scalable BI solutions using **MSBI tools (SSIS, SSRS)** and **Power BI** for healthcare and financial clients.
- Built and maintained SQL Server data warehouses, integrating data from multiple sources for accurate reporting.
- Designed and deployed **interactive dashboards** that provided actionable insights into Ad Sales, claims submissions, and financial performance.
- Conducted **root cause analysis** on data discrepancies, improving reporting accuracy by 15%.
- Developed custom **DAX formulas** and **SQL scripts** to create complex calculations and dynamic visuals.
- Trained end-users on **self-service analytics**, increasing adoption rates by 20% across departments.
- Collaborated with cross-functional teams to ensure compliance with regulatory standards and audit requirements.

Data Analyst Intern

01/2019 to 05/2020

Trigent Software

- Assisted in developing **ETL workflows** using **SSIS**, streamlining data extraction and transformation processes
- Supported the design of **SQL-based data models** and schemas for efficient reporting and analytics
- Created **Power BI dashboards** to monitor key operational metrics, reducing manual reporting efforts by 20%
- Worked with senior analysts to analyze 837 files and HCC codes, improving claims submission accuracy
- Conducted **exploratory data analysis (EDA)** using Python, identifying trends that informed business strategies

Education

Master's: Computer Science

12/2024

Central Michigan University

GPA: CGPA: 3.42

Bachelor of Technology: Computer Science

06/2022

Lingayas Vidyapeeth

GPA: Percentage: 88%

Certifications

- Microsoft Certified: Data Analyst Associate, 2023
- Tableau Desktop Specialist, 2022
- SQL for Data Science, Coursera, 2022
- Epic Clarity Data Model, In Progress

Projects

Sales Analytics Dashboard for Retail Client (Power BI and SQL)

- Designed and deployed an **interactive sales analytics** dashboard for a leading retail chain, providing real-time insights into sales trends and performance.
- Integrated data from multiple sources using **SQL Server** and **ETL pipelines** to ensure seamless data consolidation.
- Implemented **row-level security (RLS)** to ensure secure access for different business units.
- Created custom **DAX formulas** to calculate key metrics such as product performance, and regional trends.
- Achieved a **25% reduction in reporting time**, enabling faster decision-making for executive leadership.

Financial Performance Monitoring System (Azure Data Factory and Power BI)

- Developed a **financial performance monitoring solution** for a financial services company using **Azure Data Factory** and **Power BI**.
- Automated the extraction and transformation of financial data from on-premise and cloud systems, ensuring accurate and timely reporting.
- Designed **data models** using **star schema** for efficient analytics and reporting.
- Built dynamic dashboards that provided insights into profit margins, operational costs, and revenue trends.
- Increased reporting accuracy by 15% and improved compliance with audit requirements.
