

Yeswanth Gaddam

Data Engineer

Email: yeswanthgaddam97@gmail.com | [LinkedIn](#)

Irving TX

(430) 413-4639

Professional Summary:

- With **5 years** of experience as a **Data Engineer**, including profound expertise and experience on statistical data analysis such as transforming business requirements into analytical models, designing algorithms, and strategic solutions that scales across massive volumes of data.
- Experience with **Spark Core, Spark SQL, Spark MLlib, Spark Graph X and Spark Streaming** for processing and transforming complex data using in-memory computing capabilities written in **Scala**. Worked with **Spark** to improve efficiency of existing algorithms using **Spark Context, Spark SQL, Spark MLlib, Data Frame, Pair RDD's and Spark YARN**.
- Experience in writing scripts using **Python API, PySpark API and Spark API** for analyzing the data.
- Specialized in large-scale **ETL/ELT orchestration** using Cloud Dataflow, Apache Beam, AWS Glue (Studio, Workflows, Crawlers), **Azure Data Factory, Mapping Data Flows, Apache NiFi, Apache Sqoop and Informatica PowerCenter**.
- Experienced in **ETL concepts**, building **ETL solutions** and **Data modeling**.
- Expertise in designing and managing **Azure Data Factory (ADF)** pipelines for orchestrating complex **ETL and ELT** workflows across cloud and hybrid environments.
- Strong exposure to event-driven and streaming technologies like **Kafka, Amazon MSK, Amazon Kinesis Data Streams, Kinesis Data Analytics, Azure Event Hubs, and Google Pub/Sub**.
- Experience in **Data Visualization** with **Tableau** creating: Line and scatter plots, Bar Charts, Histograms, Pie chart, Dot charts, Box plots, Time series, Error Bars, Multiple Charts types, Multiple Axes, subplots etc.
- Experience in Integrating **Apache Kafka** with and created Kafka pipelines for real time processing.
- Experience working in **Azure Cloud, Azure DevOps, Azure Data Factory, Azure Data Lake Storage, Azure Synapse Analytics, Azure Analytical services, Azure Cosmos NO SQL DB, Azure HD Insight Big Data Technologies (Hadoop and Apache Spark)** and **Data bricks**.

Technical Skills:

Databases	Snowflake, AWS RDS, Teradata, BigQuery, Azure Data Bricks, Azure Data Lake, Oracle, MySQL, Microsoft SQL, Postgre SQL.
NoSQL Databases	MongoDB, Hadoop HBase and Apache Cassandra.
Programming Languages	Python, SQL, Scala, MATLAB.
Cloud Technologies	Azure, AWS, GCP
Data Formats/ETL	GitHub, JSON, Informatica Power Center, IICS
Querying Languages	SQL, NO SQL, PostgreSQL, MySQL, Microsoft SQL
Integration Tools	Jenkins, CI/CD
Scalable Data Tools	Hadoop, Hive, Apache Spark, Pig, Map Reduce, Sqoop.
Operating Systems	Red Hat Linux, Unix, Windows, macOS.
Reporting & Visualization	Tableau, Matplotlib.

Professional Experience:

Renasant Bank, Tupelo, MS, USA || Data Engineer

Oct 2024.

- Interacted with clients to gather business and system requirements which involved documentation of processes based on the user requirements.
- Developing **Spark** programs with **Python** and applied principles of functional programming to process the complex structured data sets.
- Built data ingestion workflows to load high-volume datasets into data warehouses and data lakes (**Snowflake, AWS S3, Azure Data Lake**), enabling downstream analytics and reporting.
- Design and develop **Tableau** visualizations which include preparing Dashboards using calculations, parameters, calculated fields, groups, sets and hierarchies.

- Containerized lightweight **ETL and API micro-services using Docker**, deployed to Cloud Run and GKE, enabling horizontal scaling, blue/green rollouts, and fault-tolerant reconciliation jobs.
- Worked on a direct query using **Power BI** to compare legacy data with the current data and generated reports and stored and dashboards.
- Deployed machine learning models using **Databricks MLflow**, integrated with feature engineering pipelines built in **PySpark**, supporting predictive analytics at scale.
- Created Pipelines in **Azure Data Factory (ADF)** to copy parquet files from ADLS Gen2 location to Azure Synapse Analytics Data Warehouse.
- Developed applications using **PySpark** to integrate data coming from other sources like ftp, csv files processed using **Azure Databricks** and written into **Snowflake**.
- Used **Apache Kafka** to aggregate web log data from multiple servers and make them available in Downstream systems for Data analysis and engineering type of roles.
- Designed solution for various system components using **Microsoft Azure**.
- Developed **Spark scripts** using **Python** on **Azure HDInsight** for Data Aggregation, Validation and verified its performance over MR jobs.
- Extract Transform and Load data from Sources Systems to **Azure DataStorage** services using a combination of **Azure Data Factory, T-SQL, Spark SQL, and U-SQL Azure Data Lake Analytics**.
- Worked with building data warehouse structures, and creating facts, dimensions, aggregate tables, by dimensional modeling, **Star** and **Snowflake schemas**.
- Used **GitHub** as code repository and version control system.
- Implemented **Apache Airflow** for authoring, scheduling and monitoring Data Pipelines.
- Scheduled **Airflow DAGs** to run multiple **Hive**, which independently run with time and data availability.
- Followed **agile** methodology and involved in daily **SCRUM** meetings, sprint planning, showcases and retrospective.
- Participated in the status meetings and status updating to the management team.

Wintrust Financial, Rosemont, IL, USA | | Data Engineer

Jun 2023 - Sep 2024

- Worked with the business users to gather, define business requirements and analyze the possible technical solutions.
- Implemented Python-driven **ETL pipelines** using **Azure Data Factory and Databricks**, achieving a 40% faster data transformation rate while adhering to data governance and quality standards.
- Assisted in containerizing **PySpark ETL jobs with Docker** and integrated them into **Jenkins CI/CD** workflows; supported 20+ production releases with smooth rollouts.
- Performed Data Analysis, Data Migration, Data Cleansing, Transformation, Integration, Data Import, and Data Export through **Python**.
- Developed and optimized **ETL workflows** to integrate data from relational, semi-structured, and unstructured sources into **Azure SQL, Synapse, and Data Lake**.
- Designed and developed metadata driven **Azure Data Factory (ADF)** pipelines to perform complex data integration workflows, implementing **ETL** (Extract, Transform, Load) and **ELT** (Extract, Load, Transform) processing patterns.
- Developed custom **Apache Airflow DAGs** in **Python** for orchestrating ingestion, transformation, and validation tasks on clinical and operational healthcare data.
- Encoded and decoded **JSON** objects using **PySpark** to create and modify the dataframes in **Apache Spark**.
- Involved in designing and implementing scalable **ETL pipelines** to process variety of data types (structured, unstructured), file formats (json, csv, text delimited...).
- Developed interactive dashboards and reports using **Power BI** for day-to-day business decision making and strategic planning needs
- Developed **Tableau** data visualization using Cross tabs, Heat maps, Box and Whisker charts, Scatter Plots, Geographic Map, Pie Charts and Bar Charts and Density Chart.
- Implemented data ingestion and handling clusters in real time processing using **Kafka**.
- Involved in Data Migration using **SQL, SQL Azure, Kafka, Azure Storage, and Azure Data Factory, SSIS, PowerShell**.
- Worked on Star Schema Modeling, **Snow-Flake** Modeling, FACT and Dimensions Tables, Physical and Logical Data Modeling using Erwin.
- Created **Airflow** Scheduling scripts in **Python**.
- Implemented **Apache Airflow** for authoring, scheduling, and monitoring Data Pipelines.
- Worked on **MongoDB** schema/document modeling, querying, indexing and tuning.
- Used **Agile (SCRUM)** methodologies for Software Development.

- Gathering business requirements, business analysis and design various data products.
- Develop programs in **Spark** to use on application for faster data processing than standard **MapReduce** programs.
- Developed **Apache Spark** jobs using **Scala** in test environment for faster data processing and used **Spark SQL** for querying.
- Designed **ETL workflows** on **Tableau**, Deployed data from various sources to **HDFS**.
- Developed **Tableau** data visualizations and dashboards using **Tableau Desktop**.
- Worked on **PySpark APIs** for data transformations.
- Involve in creating **Hive tables**, loading with data and writing **Hive queries** which will run internally in map reduce way.
- Use **Kafka** a publish-subscribe messaging system by creating topics using consumers and producers to ingest data into the application for Spark to process the data and create Kafka topics for application and system logs.
- Automated end-to-end pipelines using **Apache Airflow and DAGs**, ensuring reliable orchestration and monitoring of distributed workloads.
- Utilize **AWS services** with focus on big data architect /analytics / enterprise Data warehouse and business intelligence solutions to ensure optimal architecture, scalability, flexibility, availability, performance, and to provide meaningful and valuable information for better decision-making.
- Worked on **Snowflake** Schemas and Data Warehousing and processed batch and streaming data load pipeline using **Snow Pipe** and Matillion from data lake Confidential AWS S3 bucket.
- Used **GitHub** for continuous integration services.
- Worked on SQL queries in dimensional data warehouses and relational data warehouses. Performed Data Analysis and Data Profiling using Complex **SQL** queries on various systems.
- Implemented the project under **Agile** Project Management Environment and followed SCRUM iterative incremental model & configured various sprints to execute.
- Actively participated and provided feedback in a constructive and insightful manner during weekly Iterative review meetings to track the progress for each iterative cycle and figure out the issues.

- Analyzed problem and solved issues with current and planned systems as they relate to the integration and management of order data.
- Data flow check with source to target mapping of the data.
- Data matrix creation for mapping the data with the business requirements
- Data profiling to cleanse the data in the data base and raise the data issues found.
- Created and reviewed mapping documents based on data requirements
- Engaged in logical and physical designs and transforms logical models into physical model through forward engineering of **Erwin tool**.
- Perform small enhancements (data cleansing/data quality).
- Involved with **data profiling** for multiple sources and answered complex business questions by providing data to business users.
- Involved in **data mapping and data clean up**.
- Enhance smooth transition from legacy to newer system, through change management process.
- Created Datasets using **SAS proc SQL** from flat file.
- Extracted, transformed and loaded the data into databases using Base **SAS**.
- Involved in **Test case/data preparation**, execution and verification of the test results.
- Reviewed PL/SQL migration scripts.
- Coded **PL/SQL packages** to perform Application Security and batch job scheduling.
- Created **user guidance documentations**.
- Created reconciliation report for validating migrated data.

Education:

- ❖ **MS (Advanced Data Analytics) - University of North Texas** **Dec 2023**
- ❖ **BTech (EEE) - KITS College, Guntur** **Oct 2020**
