

Sai Yoshitha Murari | Data Scientist

Des Moines, IA | +1 (779) 270 4675 | yoshitha@quickitmail.com

SUMMARY

Experienced Data Scientist with 3+ years of expertise in developing and deploying machine learning models across diverse industries, including e-commerce, IT services, and finance. Proficient in using Python, R, and SQL for data analysis, with strong skills in building predictive models, performing statistical analysis, and optimizing workflows. Demonstrated expertise in deep learning techniques such as CNNs, RNNs, and Transformer models for natural language processing, recommendation systems, and computer vision. Adept at leveraging cloud platforms like AWS, Azure, and GCP to ensure scalable, cost-effective solutions. Skilled in data pipeline automation and real-time data processing using tools like Apache Airflow and Kafka. Strong communicator with a proven ability to translate complex data insights into actionable strategies, driving business outcomes through data-driven decision-making. Proficient in creating compelling visualizations using Power BI, Tableau, and Matplotlib to inform stakeholders and enhance operational efficiency.

SKILLS

Methodologies: SDLC, Agile, Waterfall

Language: Python, R, SAS, SQL, PL/SQL

IDEs: Visual Studio Code, PyCharm, Jupyter Notebook

Packages: NumPy, Pandas, SciPy, Matplotlib, Seaborn, Scikit-learn, TensorFlow, ggplot2

ETL Tools: SSIS, SSRS, SSAS

Visualization Tools: Tableau, Power BI, Excel (V-lookup, H-lookup, Pivot Tables)

Cloud Technologies: AWS, GCP, Azure

Database: MySQL, PostgreSQL, SQLite, MS SQL Server, Oracle

Version Control Tools: Git, GitHub, GitLab

Other Skills: Data Cleaning, Data Wrangling, Critical Thinking, Communication Skills, Presentation Skills, Problem-Solving, Data Analytics, Decision-making, Data Architecture, Data Management, Data Mining, Data Manipulation, Data Warehousing

Operating System: Windows, Linux, Mac

Domain Knowledge: Financial, Service, Insurance, Billing

EXPERIENCE

Capital One | Data Scientist | Mar 2024 – Present

- Developed and deployed fraud detection models using Random Forest and Logistic Regression, reducing false claims by 15%.
- Designed and deployed a personalized insurance recommendation engine using Keras and Azure Databricks, driving a 25% increase in plan adoption.
- Fine-tuned Large Language Models (LLMs) on Azure ML for personalized policy recommendations, improving customer-specific risk predictions and enhancing model accuracy by 10%.
- Integrated document retrieval using LangChain and RAG, reducing claims processing time by 25%.
- Automated complaint resolution assignment by developing text classification models with BERT and GPT-4, cutting resolution times by 30%.
- Enhanced customer support with NLP-driven sentiment analysis for claims and support queries using BERT, GPT, and NLTK, leading to faster response times and increased customer satisfaction.
- Streamlined claims processing through a scalable Apache Airflow pipeline, processing over 500,000 records daily, and reducing processing time by 40%.
- Developed real-time operational dashboards using Power BI and Tableau, enabling data-driven decisions for customer segmentation, churn rates, and policy metrics.
- Integrated predictive models into claims system using Azure DevOps, improving efficiency and reducing downtime by 20%.

Groovy Web, India | Data Scientist | Nov 2018 – Jul 2021

- Developed a demand forecasting model for IT inventory using ARIMA and Random Forest, enhancing forecast accuracy by 18% and reducing stockouts by 22%.
- Built an automated data preprocessing pipeline using Python (Pandas, NumPy), reducing data cleaning time by 50% and streamlining workflows.
- Developed advanced data visualizations in Tableau and Power BI, delivering real-time insights on key business metrics for client presentations, enhancing decision-making and client satisfaction by 30%.
- Created a sentiment analysis tool leveraging NLTK and Hugging Face Transformers, identifying key service pain points and improving customer feedback analysis.
- Deployed a recommendation engine with collaborative filtering and neural networks, boosting e-commerce platform conversion rates by 30%.
- Optimized ETL pipeline efficiency for client data processing using Apache Kafka and Azure Data Factory, ensuring real-time data flow and processing.
- Led the development and automated deployment of a credit risk scoring system using Logistic Regression, XGBoost, and AWS SageMaker, reducing loan default rates by 40% and infrastructure costs by 15%.

EDUCATION

Master Degree – Computer Science

Lindsey Wilson College, Columbia, KY
