

Yousif Moftah

(646) 719-6115 • moftahyousif@gmail.com • New York City

EDUCATION

Rensselaer Polytechnic Institute — *B.S. Information Technology & Web Science*

Microsoft Azure Certification Courses

Fundamentals (AZ-900)

AI Fundamentals (AI-900)

EXPERIENCE

Moftah Solutions — *Software Engineer* Winter 2025

- Engineered high-performance API integrations with platforms and custom solutions, improving data transfer efficiency and reducing response latency.
- Executed black-box, white-box, and gray-box penetration tests to expose security weaknesses proactively identifying and mitigating vulnerabilities.
- Designed and deployed containerized projects and facilitated seamless integration with cloud services like Azure and AWS, enhancing application scalability and performance.

NeuRoast — *Senior Software Engineer Intern* Summer 2024

- Performed comprehensive cost-benefit analyses and risk assessments to optimize business strategies, enhancing operational efficiency.
- Developed a real-time telemetry system that enabled data-driven decision-making to refine targeted advertising strategies and boost conversion rates.
- Implemented security protocols and encryption methods, safeguarding user data and ensuring compliance with industry standards.

NeuRoast — *Software Engineer Intern* Summer 2023

- Developed a high throughput, and low latency web application using React and Node that focuses on a responsive user experience, user accessibility and functionality.
 - Collaborated with a small team of successful entrepreneurs while leveraging effective communication and interpersonal skills to build strong relationships and achieve successful outcomes.
 - Applied my automation expertise to design and implement an internal system to automate payment and delivery processes, resulting in streamlined operations and increased customer satisfaction.
-

Programming Languages

General Programming Languages: Python, C++, Lua and C

Infrastructure Skills: Azure, AWS, Git and Linux

Web Technologies: HTML, CSS, JavaScript, Node, Express, React, mySQL and MongoDB
