Objective

A highly motivated Computer Science graduate with solid knowledge of Computer fundamentals. Possess strong analytical and problem-solving skills, as well as has the ability to strategize and succeed in competitive environments. Looking forward to playing a vital role in Data Analytics and adding significant value to an organization.

ACADEMIC QUALIFICATIONS

Bachelor of Technology, Computer Science

July 2013 - August 2017

Jaipur Engineering College and Research Center, Jaipur(India) with 7.67 CGPA
Relevant Courses: C Programming Language, Data Mining, Database Management System

Higher Secondary Education

March 2012

Springwood senior secondary school, India with 92.6%

PROFESSIONAL EXPERIENCE

Data Scientist at Wipro technologies, India

February 2017 - July 2017

- Worked with Data Analytics team in Corporate Travel and Expense Management Project
- Involved in Implementation of Analytics Platform comprising of building a Business Model and final deployment of the statistics
- Analyzed and conceptualized strategy for development of the model that helped the company optimize the travel budget and increase revenue
- Designed rule driven analytics engine to alert stakeholders to avoid problems and influence the behavior using predictive analysis
- Predicted Hotel and Airline Budget with the dataset of 8 lakh employees with three Year historical data
- Replaced spend right budget allocation in a more scientific manner for the year 2018
- Visualized data in Power BI and defined the critical Key performance index in order to enable senior leadership take strategic decisions

ACADEMIC PROJECTS

Machine Learning: Truth or Bluff Employee Salary detector

December 2016

- Collected Dataset of Job Positions and associated Salary and created a Data Model using Random forest regression analysis
- Predicted if the employee is bluffing about his salary in the previous company using python libraries (Sklearn, pandas, numpy)
- Analyzed and presented relationship between Position and associated Salary using matplotlib visualizations

Machine Learning: Venture Capitalist Fund Challenge Analysis

September 2016

- Collected Dataset of startup companies with R&D, Administration and Marketing Expenses with their Profit in distinct parts of United States
- Created a Data Model that would help the Venture capitalist to invest in the startups and understand what investment brings more profit using multiple linear regression
- Analyzed and presented interesting trends based on the expenses using matplotlib with marketing spend as the major factor influencing profit with 94% accuracy

TECHNICAL SKILLS

- Programming Languages: Python, C, SQL
- Skills: Machine Learning in Python, Data Analysis (sklearn, matplotlib, pandas, numpy), Natural Language Processing, Data Mining techniques
- Tools: Jupyter Notebook, Microsoft Power BI, Microsoft Excel (Pivot tables and Vlookup), Tableau

AWARDS AND EXTRA-CURRICULAR ACTIVITIES

- Performed as a violinist in Wipro Event
- Own Music Class for the needy and less fortunate kids
- Organized 'Just a Minute' Literary event in college
- Interviewer in Blood donation drive organized in JECRC Foundation
- Student of the year Award

February 2017
April 2015-January 2017
March 2015
February 2014
December 2012
